VERSION

v10 · 8 May 2026 · IST

The year we *institutionalise* what we've built, and scale toward ₹200 Crores.

Capitabel Solutions is a phygital mortgage origination platform headquartered in Chennai, connecting home loan, LAP, and MSME borrowers across South India with institutional lenders through technology-enabled matching and an on-ground team. Founded in 2023, operating under the Manor Group umbrella.

In two years we have disbursed ₹50.15 Crores across 52 files — ₹33.15 Crores across 50 third-party files and ₹17.00 Crores for Biophile Living Spaces LLP, a related-party entity under Sanctuary Spaces, disclosed transparently throughout this document. March 2026 monthly run rate stands at ₹9.6 Crores.

FY 2026-27 is the year we convert traction into institution. We scale to ₹200 Crores across five geographic clusters, ship an AI-powered lender matching engine that cuts the time to issue a Capitabel Loan Offer from seven days to forty-eight hours,* shift product mix toward higher-yield MSME and LAP, and formalise the Matching Engine Framework, SOPs, and governance that make Capitabel investor-ready by Q3.

* **Capitabel Loan Offer:** an in-principle indicative offer issued by Capitabel — not the lender — after (i) backend eligibility checks (manual today, AI Matching Engine post-Q3 FY 2026-27) and (ii) one round of validating calls with one to three shortlisted lenders. The offer specifies indicative interest rate within a range, processing fee, tenure, and other typical Key Fact Statement terms. The accountability metric paired with offer speed is the Offer Honour Rate — see §5.3 and §5.5.

The plan is built around four strategic pillars — **Grow, Build, Deepen, and Institutionalise** — and is anchored by quarterly must-win battles, a rationalised core of ten to twelve lender partners, and unit economics that move blended commission yield from 0.59% today to 1.20-1.40% on ₹200 Crores of disbursement.

By March 2027, Capitabel aims to close its first full profitable year — ₹1 Crore net — with a monthly run rate of ₹22 Crores or more, and the operating foundation to close an Angel round (₹3-4 Cr / ~\$500K) in Q3 (Oct-Dec 2026) ahead of seed conversations in early FY 2027-28. Detailed fundraise framework in **Annexure H**.

MONTHLY RUN RATE

Exit rate by Q4 FY 2026–27
From ₹9.6 Cr starting base

10–12

CORE LENDER PARTNERS

Rationalised from 40+
via scoring framework

FOUR STRATEGIC PILLARS

GROW

Scale to ₹200 Cr across five geographic clusters through structured expansion of team, lender relationships, and sourcing channels.

BUILD

Launch AI Matching Engine: borrower profile to top three lenders in minutes. Issue a Capitabel Loan Offer in 48 hours, down from 7 days.

DEEPEN

Grow MSME to 25% of volume. Deepen LAP to 10%. Higher commission yields drive profitability per crore disbursed.

INSTITUTIONALISE

Formalise the Matching Engine Framework with Thiru, SOPs, governance, and KPIs. Investor-ready by Q2 FY 2026–27 for Q3 Angel round close.

QUARTERLY MILESTONES

QUARTER	CUMUL. TARGET	MONTHLY COMMISSION	KEY MILESTONE
Q1 · Apr-Jun	₹33 Cr	₹3-4 L	Nellore branch · Claude-Zoho integration live · Matching Engine Framework with Thiru
Q2 · Jul-Sep	₹79 Cr	₹8-10 L	Matching Engine Beta · WhatsApp API · North Chennai cluster
Q3 · Oct-Dec	₹137 Cr	₹15-18 L	South Andhra ×5 towns · Engine production · Joggle pilot · Angel round closed (₹3-4 Cr)
Q4 · Jan-Mar	₹200 Cr	₹24+ L	Profitability achieved · Seed round preparation begins

PART ONE

1

Who we *are*.

A founding team built at the intersection of real estate, banking technology, and lending operations – with a strategic advisor drawn from one of India's leading MSME NBFCs.

1.1 Company overview & founding story

1.2 Founder profiles

1.3 Founding team & strategic advisor

1.4 Current operating team

1.5 Company timeline

Built on twenty-five years of South India ground.

Capitabel Solutions was founded in 2023 by Chidambaram Kattuputur and Harish Bode — two professionals with deeply complementary expertise: Chidambaram brings 15+ years in South India real estate development; Harish brings 18+ years in banking technology and digital lending built across Europe.

The founding insight: millions of creditworthy borrowers in peri-urban and Tier 2 South India are underserved — not because lenders won't lend to them, but because the matching infrastructure between borrower and lender does not exist at the ground level.

Built on Manor Group's 25+ years of South India real estate operations and community relationships, Capitabel has an embedded distribution advantage that pure digital competitors cannot replicate. We know the builders. We know the towns. We know which borrower profiles convert with which lenders. And now we are codifying that knowledge into technology.

FY 2026–27 is the year we institutionalise what we have built and scale toward ₹200 Crores — the year our model moves from founder-dependent to system-driven.

Founder Profiles

Chidambaram Kattuputur

CO-FOUNDER

Operator-investor at the intersection of real estate and fintech. 15+ years building affordable, luxury, and impact housing across South India. Masters in International Business, Grenoble Business School. CEO of Sanctuary Spaces (related entity). Earlier: Places of Impact, Purthi Realty, Manor Group.

Strengths: sales, marketing, stakeholder management, fundraising narrative, ground-level market intelligence.

Languages: Tamil, English, Telugu, Hindi · Base: Chennai

Harish Bode

CO-FOUNDER & MANAGING DIRECTOR

Banking technology leader with 18+ years across ING Netherlands, Capgemini, and Cognizant. At ING: Head of IT Custodian managing a EUR 60 billion loan portfolio; led Strategic Roadmap for Digital Business Lending; managed 150 engineers; set up and ran a peri-urban loan origination business. MBA, University of Amsterdam.

Strengths: banking technology architecture, lender network credibility, operations systemisation, credit workflow automation.

Languages: English, Dutch, Telugu, Tamil, Hindi · Base: Chennai

Devesh Narang

FOUNDING MEMBER · PARTNERSHIPS

Strategy and partnerships generalist with 4+ years building ground-up across lending, real estate, and impact ventures. At Capitabel since founding (September 2023): closed 15+ bank and NBFC partnerships, built operations infrastructure from zero, and cut loan processing TAT by 54% through automation and SOPs.

Concurrently at Places of Impact — Manor Group's affordable rental housing arm — manages P&L across a ₹1.5 Cr rental portfolio; drove 30% YoY revenue growth; led the submission that won the SDG 10 category at the ESG World Summit & GRIT Awards 2022 (Singapore). Earlier: Local Head of Finance, AIESEC Chennai, managing ₹35 Lakhs in financial assets and a 9-person finance team.

Strengths: lender relationship development, B2B partnerships, operational systems, P&L discipline. Bachelor of Commerce, Loyola College.

Languages: English, Tamil, Hindi · Base: Chennai

Thiru.R

STRATEGIC ADVISOR · PROPOSED

Institution builder with 25 years in MSME and inclusive lending. Former COO and Board Member at Kinara Capital — one of India's leading MSME NBFC platforms — where he served for 12.5 years and built institutional processes from the ground up. Earlier: Mimo Finance (Operations Director), Dhan Foundation (Microfinance Leadership), Sir Ratan Tata Trust. Harvard Business School — Strategic Leadership Programme.

Specialties: MSME secured and unsecured lending, affordable housing, LAP, green finance. Currently advising NBFCs and fintechs across India, Indonesia, and Kenya.

Languages: Tamil, Telugu, English, Kannada, Hindi

Company Timeline

2023 • FOUNDING		Capitabel Solutions incorporated. Chidambaram and Harish co-found the business in Chennai.
SEP 2023		Devesh Narang joins as founding member, partnerships lead.
FY 2024-25		First ₹25 Cr cumulative disbursed. Core lender relationships established across 20+ banks and NBFCs.
FY 2025-26		₹50.15 Cr cumulative disbursed • 52 files closed • March 2026 monthly run rate ₹9.6 Cr • Mutu and Nagindra onboard for Andhra expansion.
Q1 FY 2026-27	AHEAD	Nellore branch activation • Claude-Zoho integration live (intelligence layer of the Matching Engine) • Matching Engine Framework delivered with Thiru • Matching Engine Alpha live.
Q2 FY 2026-27	AHEAD	Matching Engine Beta • WhatsApp Business API • North Chennai cluster live • 15 core lenders rationalised.
Q3 FY 2026-27	AHEAD	South Andhra expansion to 5 towns • Engine production • Joggle embedded finance pilot • Investor deck finalised • Angel round closed (₹3-4 Cr).
Q4 FY 2026-27	GATE	₹200 Cr milestone • ₹1 Cr profit • Seed round preparation begins.
FY 2027-28 TO FY 2028-29	FUTURE	BC licence exploration • First co-lending partners • AIF Category II evaluation.

PART TWO

2

Market & *competition.*

Where Capitabel sits among India's lending originators — what we do differently, and where we must catch up.

2.1 Positioning map

2.2 Competitor summary

2.3 Capitabel's advantages

2.4 Where we must catch up

South India depth, *multi-product breadth.*

Most DSAs are either deep in one geography with a narrow product set, or national in scope but shallow on ground. Capitabel's target zone is the underserved top-right: deep South India, full product suite — Home Loans, LAP, and MSME — from one phygital relationship.

Positioning map visual to be rendered in final version — bubble chart with X-axis: South India market depth · Y-axis: multi-product breadth · Bubble size: approximate scale.

Competitor Summary

Capitabel sits in a crowded but uneven field. We've split the competitive landscape into two tables: those whose **go-to-market model overlaps directly with ours** (originators, DSAs, marketplaces, aggregators), and those whose **balance-sheet lending or infrastructure positioning makes them potential partners more than direct rivals** (NBFCs and credit infrastructure). Detailed deep-dives for every player are in Annexure A.

ORIGINATORS, DSAS, MARKETPLACES & AGGREGATORS

PLAYER	TYPE · LENDING MODEL	PRODUCTS / GEOGRAPHY	RUN RATE / AUM	FUNDS RAISED	CAPITABEL ANGLE
Capitabel	Phygital DSA · Pure originator	HL + LAP + MSME · TN + AP focus	₹200 Cr target	Pre-funding	Multi-product · South India depth · Manor RE · ING tech credibility
BASIC Home Loan	Tech DSA · Originator	Home Loan · 650 districts	₹15,000 Cr FY 2024-25	\$19.3M (Series B)	Single-product — Capitabel's LAP + MSME + South India depth differentiates
Loan Network	Digital DSA · Originator	HL + Business · Pan-India digital	₹2 Cr rev FY 2023-24	\$2.15M (Seed)	Most comparable in age · digital-only · weaker on ground than phygital
Ambak DIRECT	Tech Marketplace · Originator	HL + LAP · 35 cities · DDA partner	\$1 Bn FY 2025-26 target	\$18.1M (Series A)	Most direct competitor by product — same HL+LAP marketplace · Capitabel's edge: South India ground, MSME breadth

PLAYER	TYPE · LENDING MODEL	PRODUCTS / GEOGRAPHY	RUN RATE / AUM	FUNDS RAISED	CAPITABEL ANGLE
MoneyKarma DIRECT	Tech Marketplace · Originator	HL + Personal · Builder-site advisors	₹500 Cr/mo run rate	VC-backed (Stanford alums)	Most direct competitor by GTM — builder-site model overlaps Sanctuary Spaces play · Capitabel's edge: lender depth, MSME, AP cluster
BankBazaar	Aggregator · Originator	HL + Cards + Loans · Pan-India	₹254 Cr revenue FY 2024–25	\$134M (Series D)	Chennai-based competitor · top-of-funnel volume play · Capitabel wins on personalised service and complex files
Indifi	Marketplace + own NBFC · Hybrid	MSME unsecured · 400+ cities	₹4,100 Cr cumul. disbursed	\$120M (Series E)	Sector-specific MSME (e-com, restaurants) · Capitabel competes on secured MSME & LAP
Ruloans	DSA Aggregator · Channel	All products · Pan- India network	₹30,000 Cr+ p.a.	Bootstrapped	Current partner (27.3% of disbursements) — reduce to <15% by FY 2027–28
Andromeda	Franchise DSA · Originator	All products · Pan- India branches	Largest DSA India	Not disclosed	No near-term head-to-head · Capitabel retains own brand, not a franchise

NBFC LENDERS & CREDIT INFRASTRUCTURE

PLAYER	TYPE · LENDING MODEL	PRODUCTS / GEOGRAPHY	RUN RATE / AUM	FUNDS RAISED	CAPITABEL ANGLE
Optimo Capital	NBFC · Own book	LAP (MSME) · Digital-first	Series A stage	₹150 Cr (Series A)	Lending partner opportunity — Capitabel sources LAP, Optimo lends
Aye Finance	NBFC · Own book · Phygital	Micro-MSME · 478 branches · 18 states	₹6,028 Cr AUM (Sep 2025)	\$164M + IPO Feb 2026	Operational template for cluster-based MSME · potential lender partner
FlexiLoans	NBFC · Own + 25+ partners	MSME · 2,100+ towns · 100% digital	\$277M AUM · ₹10,000 Cr cumul	\$192M (Series C)	Lending partner opportunity for embedded MSME · digital-only — limited on-ground
Lendingkart	NBFC · 90% co-lending	MSME unsecured · 4,000+ cities	₹18,000 Cr cumul. disbursed	\$260M (Series E)	Co-lending model template · ~₹7–8 L avg ticket — overlaps Capitabel MSME band
Prayaan Capital SOUTH INDIA	NBFC · Own book · Phygital	MSME secured + unsecured · TN, AP, TG	Early-scale	₹110 Cr (Series A, Peak XV)	Direct South India MSME peer · led by ex-Five Star CEO · potential lender partner
CredRight	NBFC · Own book	MSME (chit-fund- linked) · Hyderabad	Series B stage	\$26.2M (Series B)	Niche borrower segment — Capitabel can refer chit-fund subscribers needing additional credit

PLAYER	TYPE · LENDING MODEL	PRODUCTS / GEOGRAPHY	RUN RATE / AUM	FUNDS RAISED	CAPITABEL ANGLE
Stride One	NBFC · Own book · Anchor-led	Startup supply-chain MSME · Pan-India	Series B stage	\$59M (Series B)	Different niche (startup ecosystems) · low overlap · monitor for cross-referrals
Easy Home Finance	NBFC HFC · Own book + DCB partnership	Affordable HL ₹10–50 L · 150+ locations target	\$300M AUM target (24 mo)	\$60.1M (Sumitomo, Claypond)	Lending partner opportunity for affordable HL in peri-urban geographies
KreditBee	NBFC · Own book + 12 partners	Unsecured + LAP · Pan-India digital	\$1.5 Bn AUM (Mar 2026)	\$700M+ (Unicorn, pre-IPO)	Expanding into LAP & secured — emerging competitor in unsecured Personal/MSME · pure-digital, weak on-ground
FinBox VENDOR	Credit infrastructure · SaaS	Lending APIs & AI · Powers HDFC, Kotak, ABG Capital	Powers 100+ lenders	\$51.1M (Series B)	Vendor opportunity — could power Capitabel's Matching Engine bureau / KYC / decisioning APIs

Run Rate / AUM column shows the most recent reported scale metric — varies by company depending on what they report (annual disbursement, AUM, cumulative disbursement, or revenue). Funds Raised is cumulative equity. **Direct** flag indicates closest GTM/product overlap with Capitabel; **South India** flag indicates direct geographic overlap; **Vendor** flag indicates infrastructure/partner relationship. Detailed deep-dives in Annexure A.

Capitabel's Advantages

Deep South India roots. Tamil and Telugu markets, cultural and linguistic fit, peri-urban community relationships built over Manor Group's 25+ years.

Phygital model. On-ground trust combined with technology-enabled matching — digital-only competitors cannot replicate the trust layer; brick-only DSAs cannot match the speed.

Real estate integration. Sanctuary Spaces provides a captive pipeline at the point of property transaction. Most DSAs acquire leads; we are embedded where lead intent originates.

MSME credit specialisation. Thiru.R brings Kinara Capital COO-level expertise — a depth of underwriting judgment that most DSAs source externally or not at all.

Institutional lender credibility. Harish Bode's EUR 60 Bn ING portfolio and lending-tech architecture background let us engage credit teams at an institutional level, not as a vendor.

Multi-product offering. HL + LAP + MSME from one relationship — higher lifetime value per client, better unit economics than single-product DSAs.

Proprietary matching engine in development. The competitive moat we are building. Borrower profile to top-three lenders in minutes, not days.

Customer-interest-first matching. The Matching Engine ranks lenders by borrower fit, not by what pays Capitabel best. Direct lender relationships are preferred over channel partners at equal payout. Where channel-partner premium exists, it's flagged for management decision rather than auto-routed (see §5.2 Step 4). Most DSAs route by commission share — we route by borrower outcome.

Where We Must Catch Up

Technology. Matching engine 12–18 months behind BASIC Home Loan and Loan Network. Closing this gap is the single largest FY 2026–27 technology investment — see Part Five and Annexure E.

Scale. 100× behind Andromeda in volume terms today. Scale is not the near-term battle — profitability and product mix are — but must be on the horizon post-FY 2027–28.

Brand. Unknown outside our clusters. Content, digital, and community investment needed urgently — and planned across Q1–Q3 FY 2026–27 (see Sourcing Strategy, Part Five).

Governance. Investor-grade documentation being built now with Thiru.R. Target: complete by Q2 FY 2026–27 for Angel round readiness.

Regulatory Compliance. As an LSP under RBI's Digital Lending Guidelines (2022), the BC framework update (effective Jul 2026), and DPDP Act 2023, Capitabel has clear obligations on KFS disclosure, grievance redressal, data privacy, and conduct standards. Internal compliance posture not yet institutionalised. Mitigation in motion via Thiru's regulatory experience and Annexure E.3 — see also §6.3.

Regulatory Intelligence. RBI product circulars, MSME policy updates, priority sector guidance, sectoral exposure norms — currently tracked ad-hoc, not systematically. Closing this gap is a Phase 1 deliverable of the Matching Engine (Annexure D — external intelligence ingestion). Knowing what RBI is encouraging vs constraining lets us match files better, advise borrowers, and surface product gaps to lender partners.

PART THREE

3

Where we *stand*.

Two years in. ₹50.15 Crores disbursed across 52 files. A clear picture of what works – and where the leverage is for FY 2026–27.

-
- | | | | |
|-----|--------------------------|-----|------------------------------|
| 3.1 | Portfolio at a glance | 3.2 | Third-party portfolio detail |
| 3.3 | Related party disclosure | 3.4 | Geography & product split |
| 3.5 | Top lender relationships | 3.6 | Key observations |

Portfolio at a glance.

Since inception, Capitabel has disbursed ₹50.15 Crores across 52 files, earning ₹24.80 Lakhs in commission. Of this, ₹33.15 Crores relates to 50 third-party files; ₹17.00 Crores is Biophile Living Spaces LLP, a related party, disclosed transparently and separately wherever statistics would be materially skewed.

Data as at 4 April 2026 — refresh pending. Figures in this section to be updated with closings through 17 April 2026 before next circulation.

TOTAL PORTFOLIO — ALL 52 FILES (INCLUDING BIOPHILE)

₹50.15 Cr TOTAL DISBURSED Incl. ₹17 Cr Biophile related party	₹52.09 Cr TOTAL SANCTIONED 96.3% approval rate	₹24.80 L TOTAL COMMISSION All 52 files	52 FILES CLOSED Unique deals since inception
---	--	--	--

THIRD-PARTY PORTFOLIO — 50 FILES (EXCLUDING BIOPHILE)

₹33.15 Cr THIRD-PARTY DISBURSED 50 independent client files	₹25.3 L MEDIAN TICKET SIZE True peri-urban market profile	₹66.3 L MEAN TICKET SIZE Average across 50 files	₹4.94 Cr LARGEST THIRD-PARTY Home Loan, Chennai
---	---	--	---

RELATED PARTY DISCLOSURE · BIOPHILE LIVING SPACES LLP

Biophile Living Spaces LLP is a related-party entity under Sanctuary Spaces, where Chidambaram Kattuputur is CEO. Two files totalling ₹17.00 Crores were originated by Capitabel to Central Bank of India: ₹9.00 Cr Construction Finance and ₹8.00 Cr Commercial Land / Property. This is valid, commissionable business — disclosed as related party in financials and investor materials. Biophile's large ticket sizes skew mean and median statistics, which is why third-party metrics are presented separately above.

Top Lender Relationships

LENDER	DISBURSED	FILES	NOTES
Central Bank of India RELATED	₹17.00 Cr	2	Biophile construction finance — related party only
ICICI Bank Ltd	₹5.28 Cr	2	Chennai home loans — large tickets
Karur Vysya Bank Ltd	₹5.05 Cr	2	MSME business loans — Hosur + other
Indian Overseas Bank	₹4.92 Cr	3	Mix — home loan + plot · Chennai + Nellore
HDFC Bank Ltd	₹3.60 Cr	2	Chennai premium home loans

LENDER	DISBURSED	FILES	NOTES
Repco Home Finance	₹3.29 Cr	12	Peri-urban workhorse — 12 files, Andhra cluster
Tata Capital Ltd	₹3.13 Cr	4	Cross-product, multi-geography
State Bank of India	₹2.75 Cr	2	Chennai — 2 large home loans
Canara Bank	₹2.00 Cr	4	Nellore, Tada, West Godavari — affordable HL
Bajaj Housing Finance	₹1.30 Cr	1	Chennai home loan
HomeFirst Finance VALIDATE	₹X Cr	X	Affordable HL · peri-urban + Tier 2 · target lender partner — see Annexure E.1
Muthoot Finance VALIDATE	₹X Cr	X	LAP + property-backed SME credit · South Andhra cluster
Piramal Finance VALIDATE	₹X Cr	X	HL + LAP · Chennai urban + Tier 2 · housing finance focus

Top 13 relationships above account for ~95% of disbursed value. **Full lender portfolio with all 30+ lender relationships, file-level breakdown, product mix, and geography spread is in Annexure I.**

Key Observations

South Andhra: high volume, low ticket. 26 of 50 files (52% of count) but only 16.2% of value — confirms the peri-urban profile. Repco Home Finance is the workhorse here with 12 files.

Chennai dominates value at 68.9% with only 11 files. Driven by large-ticket home loans and MSME deals. Ticket size variance by geography is the most important FY 2026–27 planning variable.

MSME upside is outsized. Average ticket of ₹252.5 L from only 2 files highlights the leverage — every additional MSME file has disproportionate commission impact. Growing from 2 to 15–20 MSME files is the single biggest revenue lever in the plan.

Commission yield sits at 0.59% blended on third-party disbursements. Improving product mix toward MSME and LAP lifts this to 1.20–1.40% in FY 2026–27 — the core of our profitability thesis. See Part Four, Section 4.2.

Repco: the relationship to prioritise for peri-urban scale. Reliable, growing trust, aligned on affordable housing. One of the 10–12 core lenders we will commit to post-rationalisation.

Ruloans concentration risk is real. 27.3% of disbursements routed through Ruloans (see Risks, Part Six). FY 2026–27 goal: reduce to <15% via Matching Engine routing preferences (§5.2 Step 4) without losing volume by building direct lender relationships.

PART FOUR

4

Where we're *going*.

₹200 Crores is the number. But the substance is the mix – the shift from 0.59% blended yield to 1.20–1.40%, the move from 2 MSME files to twenty, and the compression of time-to-Loan-Offer from seven days to forty-eight hours.

THE CAPITABEL PROMISE TO BORROWERS

A Capitabel Loan Offer in 48 hours, not a wait for a lender.

National fintechs make borrowers wait for a lender's decision. Traditional DSAs make borrowers chase paperwork through a black box. Capitabel issues its own in-principle Loan Offer within 48 hours of file completion – specifying indicative interest rate within a range, processing fee, tenure, and other Key Fact Statement terms – backed by our matching engine and validated through one round of calls with one to three shortlisted lenders. The accountability metric is the **Offer Honour Rate**: the percentage of Capitabel Loan Offers that result in a lender sanction on materially equivalent terms. Target: 60% in Q1, ramping to 85% by Q4 FY 2026-27 (see §5.5 KPI Scorecard).

And one more thing: *Capitabel routes you to the lender that's best for you – not the one that pays us best.* See §5.2 Step 4 for the matching decision hierarchy.

4.2 · Commission Rate Evolution

The move from 0.59% blended commission yield to 1.20–1.40% is the central lever behind our ₹1 Crore profitability target. This is not aspiration – it is arithmetic. The product mix shift does the work.

CURRENT VS TARGET PRODUCT MIX

CURRENT MIX (FY 2025-26)

Home Loans	~80%	@ 0.50%
LAP	~8%	@ 1.00%
MSME	~12%	@ 1.20%

TARGET MIX (FY 2026-27)

Home Loans	65%	@ 0.60%
LAP	10%	@ 1.20%
MSME	25%	@ 1.35%

0.59% blended

1.20–1.40% blended

From ₹200 Crores disbursed to ₹1 Crore net profit.

₹200 Cr disbursed × 1.12–1.33% blended commission	₹2.25–2.65 Cr gross
Less total operating costs	(₹2.20–2.50 Cr)

= Net profit range **₹0–45 L low case · ₹100 L+ high case**

Hitting ₹1 Crore requires landing in the upper half of the gross revenue range — driven by product mix shifting toward MSME and LAP — **and** the lower half of the cost range, driven by disciplined hiring pace and tech-build cadence.

THREE VARIABLES THAT MOVE US INTO THE HIGH CASE

1. **MSME files grow from 2 to 15–20.** Each MSME file delivers ~₹2 L commission versus ~₹17K for a peri-urban HL — the leverage per file is roughly 12×.
2. **LAP files double** via Sanctuary Spaces property referrals — ~₹50K average commission per file at FY 2026–27 rates.
3. **Rationalised lender panel unlocks 10–20 bps** commission improvement on each of the 10–12 core lenders.

4.3 · Unit Economics

What each file costs to originate, what it earns, and the break-even count per product.

PRODUCT	AVG TICKET	COMMISSION RATE	COMMISSION / FILE	COST / FILE	NET / FILE	BE FILES
Home Loan · Urban	₹80 L	0.60%	₹48,000	₹18,000	₹30,000	—
Home Loan · Peri-urban	₹20 L	0.85%	₹17,000	₹9,000	₹8,000	—
LAP	₹60 L	1.20%	₹72,000	₹22,000	₹50,000	—
MSME · Business Loan	₹1.5 Cr	1.35%	₹2,02,500	₹42,000	₹1,60,500	—
FY 2026–27 Full Year	—	1.25%	₹2.5 Cr gross	₹2.2 Cr	₹30–50 L direct	~140

Cost-per-file figures above are indicative working assumptions built from a structured methodology covering direct costs (connector payouts, sourcing channel fees), indirect costs (time-attributed salaries across RM, Credit & Ops, Customer Support, ASM, founders), and overhead allocation (technology, office, marketing, advisor, admin). **Full build-up, methodology, and the four critical assumptions awaiting team validation are in Annexure G.** Break-even file count (~140) is the minimum file volume at target mix to cover fixed costs. FY 2026–27 plan targets 180–220 files, giving a ~₹50 Cr MSME leverage on the upside.

4.4 · Product Strategy by Geography

GEOGRAPHY		PRODUCT		FY 2026-27		TARGET		AVG TICKET		KEY LENDERS & SOURCING	
CHENNAI — ₹120 CR · JOINT OWNERS: CHIDU (50% DIRECT = ₹60 CR) + HARISH (20% DIRECT = ₹24 CR) — SEE ANNEXURE K											
		Home Loans		₹60 Cr		₹50-300 L		HDFC · ICICI · SBI · IOB · Bajaj · BNI + CREDAI + developers			
		MSME / Business		₹40 Cr		₹50-500 L		KVB · Central Bank · ICICI · Thiru network + Joggle			
		LAP		₹20 Cr		₹30-200 L		Tata Capital · Bajaj · IOB · Sanctuary Spaces referrals

		LAP		₹6 Cr		₹15-80 L		Lender mix to follow geography decision			
FY 2026-27 TOTAL				₹200 Cr							

Geographic Expansion – ₹40 Cr decision pending. The fifth cluster contributing ₹40 Cr (20% of the FY 2026–27 target) has not been finalised. Three options under evaluation: **(a) South Andhra cluster expansion** – adding 2–3 additional Tier 2/3 towns adjacent to existing Sullurpet operations (e.g. Tirupati, Renigunta, Gudur); **(b) Tier 2 Tamil Nadu town** – Coimbatore, Madurai, or Salem, with an established BNI presence and rising real estate activity; or **(c) Tier 1 metropolitan launch** – Bengaluru or Hyderabad, leveraging Manor Group / Sanctuary Spaces relationships. **Decision required by Q1 FY 2026–27 close (June 30 2026)** for hire pipeline and lender outreach to begin Q2. Each option implies a different unit-economics profile, lender mix, and team-build sequence – covered in the FY 2026–27 quarterly review with Thiru.

Gummidipoondi SIPCOT Industrial Estate represents a differentiated MSME opportunity – small manufacturers and suppliers that digital-first competitors cannot access on-ground. Chennai alone accounts for 60% of the ₹200 Cr target; the four named clusters together contribute 80%; the fifth cluster (TBD) closes the remaining 20%.

4.5 · Customer Personas

Six archetypal Capitabel borrowers – three products × two geography classes (Tier 1 / Tier 2 & rural agglomerations). These profiles shape sourcing, documentation workflow, lender matching, and communication style. The team will populate the descriptive cells in Q1 as part of the Zoho CRM configuration.

HOME LOAN PERSONAS

Archetype	Income Band	Age Range	Typical Ticket	Primary Pain Point	How They Find Us
Tier 1 · Salaried Professional CHENNAI CORE	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Tier 1 · Business Owner CHENNAI CORE	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Tier 2 · Aspirant First Buyer NELLORE / NORTH CHENNAI	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Peri-urban · Informal Income SOUTH ANDHRA CLUSTER	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]

LAP PERSONAS

Archetype	Income Band	Age Range	Typical Ticket	Primary Pain Point	How They Find Us
Tier 1 · Property-Backed SME CHENNAI	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Peri-urban · Asset-Rich Small Business ANDHRA / NELLORE	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]

Archetype	Revenue Band	Sector	Typical Ticket	Primary Pain Point	How They Find Us
Tier 1 · Growth-Stage Business CHENNAI URBAN	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Tier 1 · Mature Family Business CHENNAI / HOSUR	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Industrial · SIPCOT Manufacturer GUMMIDIPOONDI / SRIPERUMBUDUR	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]
Peri-urban · Informal Small Business AP CHAMBERS / RURAL AGGLOMERATIONS	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]	[Team to fill]

Personas to be completed by Devesh + Monica during Zoho CRM configuration (Q1 FY 2026–27, target May 15). Each archetype should include: typical document set, common objections, channel preference (WhatsApp / phone / in-person), and which 2–3 lenders best match the profile.

4.6 · Revenue & Profitability

LINE ITEM	Q1-Q2	Q3-Q4	FULL YEAR
Gross Commission Revenue	₹55–65 L	₹170–200 L	₹225–265 L
Salaries & Incentives	₹60–70 L	₹80–90 L	₹140–160 L
Technology Investment	₹15–20 L	₹10–15 L	₹25–35 L
Office, Admin, Travel	₹10 L	₹15 L	₹25 L
Marketing, Memberships, CAC	₹8 L	₹10 L	₹18 L
Strategic Advisor Retainer (Thiru)	₹6 L	₹6 L	₹12 L
TOTAL COSTS	₹99–114 L	₹121–136 L	₹220–250 L
NET PROFIT TARGET	Break-even	₹50–80 L	₹100 L (₹1 Cr) ✓

Q1 requires ~₹2–3 Lakhs working capital bridge from existing reserves. Cash-flow positive from Q2. No external funding assumed. Gross commission revenue of ₹225–265 L implies a blended yield of 1.12–1.33% on ₹200 Cr – aligned with the 1.20–1.40% target band.

PART FIVE

5

How we'll *get there.*

Sourcing, operations, and the systems that turn activity into outcomes. The framework for rationalising forty-plus lenders to ten to twelve – and the KPI discipline that holds the plan together.

-
- | | | | |
|-----|----------------------------------|-----|----------------------------------|
| 5.1 | Sourcing strategy | 5.2 | Lender rationalisation framework |
| 5.3 | Branch-led operations | 5.4 | Process standards & TAT |
| 5.5 | KPI scorecard & must-win battles | | |

Three channels, one funnel.

CHANNEL 1 · ASSOCIATIONS & PROFESSIONAL NETWORKS

ASSOCIATION	OWNER	STATUS	OPPORTUNITY & ACTION
BNI Chennai Chapter	Harish	Active ✓	MSME + HL leads from SME owners · cross-referrals · expand with RM support
BNI Nellore Chapter	Mutu (proposed)	Evaluate Q1	Accelerate Nellore lead flow · target first BNI file by Q2
Young Indians · CII	Devesh (proposed)	Evaluate Q1	Younger professionals + startup founders · HL sweet spot ₹40–100 L
CREDAI (via Sanctuary Spaces)	Chidu	Yet to initiate	Embedded HL at property purchase · builder captive pipeline
TN MSME Association / CII	Harish / Devesh	Identify Q2	MSME business loan pipeline · Thiru's Kinara network connects here
AP Chambers · Nellore	Mutu	Identify Q2	Business loan sourcing in Nellore · Tier 2 credibility building
Banker Network — reverse-referrals	Harish	Identify Q1	Bankers refer files they can't service themselves (off-policy, geography mismatch, ticket size, NPA exposure constraints) · target: formalise with 5 core banker contacts by Q2 — high-quality lead source
Government Organisations & Associations (TNHB, MSME Bhavan, trader associations)	Devesh	Identify Q2	TNHB empanelment for housing finance facilitation · MSME Bhavan tie-ups · trader association partnerships — institutional channel for HL and MSME leads

CHANNEL 2 · FEET-ON-STREET (BRANCH-LED)

GEOGRAPHY	MODEL	FY 2026–27 TEAM	BREAK-EVEN NOTES
Chennai Urban	HQ Branch + 3–4 Field RMs	6–8 staff	Already viable at ₹9.6 Cr/month — scale focus on MSME & LAP
Nellore — Tier 2	Sub-office Q1 + 1 ASM + 2 RMs	3 staff	₹1.5 Cr/month to break even — sub-office live by May 2026
South Andhra Cluster	Mutu (ASM) + Nagindra + 1 new RM	3 staff	₹0.8 Cr/month — expand to 5 towns by Q3 FY 2026–27
North Chennai	1 RM Q2 → sub-branch Q4	1–2 staff	₹0.7 Cr/month target — Gummidipoondi SIPCOT is the MSME unlock

The channels listed below are **foundational digital infrastructure** — necessary, but not sufficient. The strategic FY 2026–27 priority is **deeper digital sourcing partnerships**: embedded finance, marketplace integrations, and ecosystem plays that drive committed lead volume, not just channel presence. Target: **3 signed digital sourcing partnerships by Q4 FY 2026–27**, each backed by a defined lead volume commitment. Joggle (construction equipment marketplace) is the lead candidate. Owner: Devesh, with Thiru's network support — see Annexure C.

CHANNEL	PRIORITY	ACTION & EXPECTED OUTCOME
Capitabel.com · website funnel	HIGH	Rebuild blog (10 SEO articles) · team page · analytics → CRM · 50+ leads/month by Q2
Google My Business · Local SEO	HIGH	4 verified listings · "home loan near me" capture · 20+ reviews per location
Joggle · construction equipment MP	HIGH	Contractor MSME embedded finance · MoU Q2 · ₹5 Cr MSME pipeline by Q4
WhatsApp Business API	MED	Automated lead intake + document collection + milestone updates · 20 leads/month
QR Codes at Developer Sites	MED	Builder on-site QR → eligibility → lender match · 10 sites Q3, 50 by Q4
PropTiger / 99acres / Housing.com	MED	Embedded HL offer at property search · pilot 1 platform by Q2
YouTube · Tamil and Telugu	MED	20 videos by Q3 · build trust in Andhra + North Chennai · 500+ views avg
Account Aggregator (AA)	FY 2027–28	Consent-based income verification · critical for informal earner MSME

From forty to *ten-twelve*.

A structured framework to identify which lenders deserve a core slot on the Capitabel panel. Cutting from 40+ to 10–12 is not arbitrary – it is the product of a decision tree (qualification) and a weighted scoring matrix (prioritisation). The remaining lenders stay in the network for specific edge cases but do not receive investment of relationship bandwidth.

STEP 1 · DECISION TREE (QUALIFICATION)

The decision tree is applied in Q1 FY 2026–27 by Devesh & Harish, with Thiru's credit-policy lens on the Q3–Q4 gates (commission benchmark, TAT & approval rate, strategic fit). Output: a shortlist of ~15 lenders that proceed to the scoring matrix below. The 10–12 with the highest scores become the FY 2026–27 core panel.

STEP 2 • WEIGHTED SCORING MATRIX (PRIORITISATION)

For the ~15 lenders that pass the decision tree, score each on the five dimensions below. Weights reflect Capitabel's FY 2026–27 priorities. The top 10–12 by total score become the core panel.

Dimension	What we measure	Weight	Score 1	Score 3	Score 5	Max
Commission Yield	Effective commission rate vs product benchmark	25%	Below benchmark	At benchmark	≥ 20 bps above	1.25
Approval Rate	% files sanctioned vs submitted (last 12 months)	20%	< 60%	60–80%	> 80%	1.00
Sanction TAT	Working days from full file submission to sanction	15%	> 15 days	7–15 days	< 7 days	0.75
Geographic Fit	Coverage of TN + AP target geographies	15%	Limited branches	Adequate	Dense + active BDM	0.75
Product Breadth	Does lender take HL + LAP + MSME from us?	15%	One product	Two products	All three	0.75
Relationship Depth	BDM responsiveness, escalation path, digital readiness	10%	Transactional	Established	Institutional	0.50
TOTAL			Max score			5.00

Threshold for core panel: ≥ 3.50. Lenders scoring 2.50–3.49 remain in network tier – used for specific cases where geographic/product fit is required but no core lender matches. Scores are reviewed quarterly with Thiru and adjusted based on lived experience (see Thiru's Q3 Matching Engine Review deliverable).

WHY 10–12 IS THE RIGHT NUMBER

Not fewer (fragility), not more (fragmentation).

10 lenders minimum ensures coverage across three products × four geographies with redundancy for any single lender going cold. **12 lenders maximum** is the point beyond which RM attention per lender drops below the threshold needed to maintain institutional-grade relationships. Above 12, every additional lender actively dilutes the quality of the existing relationships – the opposite of what consolidation is supposed to achieve. Revisit annually.

STEP 3 • NETWORK EXPANSION VIA THE MATCHING ENGINE

The decision tree and scoring matrix above shortlist from the *existing* network of 40+ lenders. Beyond that, the Matching Engine (Annexure D) actively surfaces **candidate lenders we should be exploring** – based on (i) observed gaps in our core panel against incoming borrower profiles, (ii) external intelligence on which lenders are aggressively growing in our geographies and products, and (iii) NPA and sector-exposure signals from public domain data. Surfaced candidates re-enter the decision tree at Step 1 each quarter. This makes the rationalisation framework dynamic, not static – the core panel evolves as the Matching Engine learns.

Having a rationalised core panel of 10–12 lenders is the supply side. The demand side — which lender to recommend for a specific borrower — is governed by a **four-rule decision hierarchy** that the Matching Engine applies to every file:

RULE	PRINCIPLE	WHAT IT MEANS IN PRACTICE
1	Customer interest first	Engine ranks lenders by borrower fit — approval probability, indicative rate, processing fee, sanction TAT, KFS terms — <i>not</i> by what pays Capitabel best. Borrower outcome is the primary sort.
2	Direct over channel at equal payout	Where Capitabel has a direct accord with a lender AND the same lender is reachable via Ruloans / Andromeda / other channel partner, default to direct. Builds direct relationship equity, reduces channel concentration risk, improves margin.
3	Channel premium → flag for management	If channel-partner payout exceeds direct by a material margin (working threshold: 25 bps or more), engine flags the file for management review. Founders decide case-by-case: take the higher margin or invest in the direct relationship. <i>Not auto-routed</i> .
4	Surface non-core alternatives	If a non-core lender (outside the 10–12 panel) is genuinely the best fit for a specific borrower, engine surfaces this internally so management sees what's missing — feeds back into Step 3 network expansion.

This hierarchy is the operational mechanism that delivers two of Capitabel's stated strategic outcomes: (a) reducing Ruloans concentration to <15% by FY 2027–28 (§6.1) by preferring direct routes, and (b) the customer-trust positioning of "we route by borrower outcome, not commission" (§2.3, §4.1). Tracked monthly via the % Disbursements via Direct KPI (§5.5) ramping from ~75% in Q1 to 85% by Q4 FY 2026–27.

5.3 · Process Standards & TAT

PROCESS STEP	TARGET TAT	TRACKING & OWNER
Lead first contact after enquiry	< 2 hours	Zoho CRM timestamp · Monica / on-duty RM
Document collection from customer	< 48 hours	Zoho document checklist · responsible RM
Lender matching & recommendation	< 24 hrs of complete docs	Matching engine log · surfaces direct-vs-channel routing comparison · channel-premium routing requires management approval (§5.2 Step 4) · Harish reviews weekly
Capitabel Loan Offer issued HEADLINE	< 48 hours from complete docs	Matching engine log + offer document · Harish (Q1 baseline → ramp to 100% adherence by Q3)
Offer Honour Rate (vs lender sanction)	≥ 60% Q1 → ≥ 85% Q4	Loan Offer terms vs final KFS · interest range / processing fee ±10% / tenure / KFS terms · Devesh tracks weekly
File submission to lender	< 3 working days	Zoho submission stage log · Credit & Ops Exec
Sanction — lender TAT (target)	5–10 working days	Track per lender · Devesh escalates if exceeded
Disbursement after sanction	< 7 working days	Zoho disbursement log · Devesh / Harish
Commission receipt after disbursement	< 30 days	Accounts tracker · escalate at 45 days

5.5 · KPI Scorecard & Must-Win Battles

METRIC	FY 2025-26				
	BASELINE	Q1 TARGET	Q2 TARGET	Q3 TARGET	Q4 TARGET
Monthly Disbursement	₹9.6 Cr	₹12 Cr	₹17 Cr	₹20 Cr	₹22 Cr
Files per Month	4-5	7-8	12-14	16-18	18-20
MSME % of Volume	15%	18%	22%	24%	25%
Active Core Lenders	40+	20	15	12	10-12
Matching Engine Coverage	0%	0% Alpha	40% Beta	60%	70% Full
Active RMs across clusters	2	4	6	8	8-10
Customer NPS	Not tracked	Baseline	> 60	> 65	> 70
Lead-to-Submission TAT	> 7 days	< 5 days	< 4 days	< 3 days	< 3 days
Time-to-Loan-Offer	~7 days	< 5 days	< 72 hrs	< 48 hrs	< 48 hrs
Offer Honour Rate	Not tracked	≥ 60%	≥ 75%	≥ 80%	≥ 85%
% Disbursements via Direct	~73%	75%	80%	82%	85%

FOUNDER & KEY-PERSON DIRECT SOURCING — SEE ANNEXURE K

Chidu Direct Sourcing (Chennai)	—	₹10 Cr	₹24 Cr	₹42 Cr	₹60 Cr
Harish Direct Sourcing (Regional + 20% Chennai)	—	₹7 Cr	₹17 Cr	₹30 Cr	₹44 Cr
Devesh Direct Sourcing (cross-geo, comp trigger)	—	₹5 Cr	₹12 Cr	₹21 Cr	₹30 Cr

Reporting cadence: **Daily** standup (15 min) on pipeline movement and blockers · **Weekly** — disbursement, files, lead TAT, lender submission TAT reviewed every Monday 9am · **Bi-weekly** tech & engine review (alt Wednesdays) on Phase milestone progress · **Monthly** — full scorecard review with founders first Tuesday of each month · **Quarterly** — board-level review with Thiru, opening with Macro Review (per \$6.6 sources), then must-win battle progress and next-quarter recalibration. Full review formats and templates in **Annexure J · Review Cadence & Formats**.

Q1 FY 2026-27 · TOP 3 MUST-WIN BATTLES

1. **Nellore branch live by May 31** — office, first ASM, one RM, first file by June 30. Owner: Harish.
2. **Claude-Zoho integration live by May 15** — first 10 banker and customer conversations transcribed, contextualised, and feeding the Matching Engine. Owner: Harish.
3. **Matching Engine Framework approved by June 30** — HL, LAP, MSME matching policies covered, ready for RM field use. Owner: Thiru + Devesh.

6

Risks & *mitigations.*

An honest accounting of what could go wrong, graded by likelihood and impact – and what we are doing about each. Detailed risk register in Annexure F.

-
- | | | | |
|-----|------------------------|-----|---------------------------|
| 6.1 | Concentration risk | 6.2 | Commission rate shift |
| 6.3 | Regulatory change | 6.4 | Ramp-rate risk |
| 6.5 | Team & key-person risk | 6.6 | Macro & real estate cycle |

What could go wrong – and how we hold the line.

Grading convention: **HIGH** indicates material impact and $\geq 30\%$ probability in the plan period. **MEDIUM** is meaningful impact or moderate probability. **LOW** is monitored but not actively mitigated.

1 Concentration risk – Ruloans & Repco dependencies

HIGH

Ruloans currently routes 27.3% of Capitabel disbursements; Repco Home Finance accounts for 12 of 50 third-party files (24% of peri-urban file count). A change in commercial terms from either – or a withdrawal – would materially affect FY 2026–27 trajectory.

MITIGATION · Reduce Ruloans share to $<15\%$ by FY 2027–28 by building direct lender relationships with 10–12 core panel lenders. **Operationalised via Matching Engine decision hierarchy (§5.2 Step 4)** which prefers direct routes at equal payout and flags channel-partner premium for management review rather than auto-routing. Tracked monthly via the % Disbursements via Direct KPI (§5.5). Repco remains a priority core-panel relationship – institutionalise via signed agreement with documented volume commitments and commission terms (Q2 target). Never let a single lender exceed 20% of quarterly disbursement.

2 Commission rate thesis does not materialise

HIGH

The ₹1 Cr profit target is load-bearing on moving blended yield from 0.59% to 1.20–1.40%. If MSME and LAP volumes fall short, or if core-panel commission negotiations fail, the full-year profit could compress to ₹40–60 L.

MITIGATION · Thiru's MSME underwriting credibility and Kinara network relationships unlock MSME lender commission negotiations in Q1–Q2. LAP is structurally supported by Sanctuary Spaces referrals. Monthly commission-yield tracking in the KPI scorecard surfaces drift early. Contingency: if yield tracks at 1.00–1.10%, scale monthly disbursement target by ~15% to hold the absolute commission target.

3 Regulatory change – RBI BC framework, Digital Lending, FLDG

MEDIUM

RBI's updated Business Correspondent framework (effective July 2026) and the Co-Lending Directions 2025 will reshape what DSAs can and cannot do. Adverse reclassification could restrict revenue models; favourable classification opens co-lending upside.

MITIGATION · Monthly regulatory monitoring by Harish. Thiru provides institutional read on likely direction via Kinara network. Compliance audit pre-October 2026 to ensure new-framework readiness. Scenario planning in Q3 for both adverse and favourable regulatory outcomes – each with a prepared response path documented in the governance pack.

4 Ramp rate — 4× growth is aggressive

MEDIUM

March 2026 monthly run rate is ₹9.6 Cr. Q4 FY 2026–27 target is ₹22+ Cr — a 2.3× monthly scale while simultaneously expanding geographically, launching technology, and shifting product mix. Execution risk is substantial.

MITIGATION · Quarterly must-win battles create focus and accountability. Branch-level break-even thresholds (₹0.7–1.5 Cr/month) mean each new geography has a defined path to contribution. Weekly KPI review catches slippage in week 2, not month 3. If Q1 closes below ₹33 Cr cumulative, Q2 plan recalibrates before scaling commits further team cost.

5 Team & key-person risk

MEDIUM

Chidambaram, Harish, Devesh, and Thiru each hold concentrated domain knowledge and relationships. Loss of any would materially set back the plan. FY 2026–27 hiring plan adds 12 roles — onboarding velocity and culture retention are material execution risks.

MITIGATION · Documented SOPs, Matching Engine Framework, and lender knowledge base move critical knowledge from founders to systems. Banker CRM (Q4 deliverable) ensures lender relationship data lives in Zoho, not founders' heads. Thiru's 6-month advisory retainer formalises knowledge transfer; extension is contingent on documentation completion.

6 Macro & real estate cycle

LOW

A material slowdown in South India residential real estate would compress home loan origination volume. Rising interest rates compress ticket sizes. These are beyond Capitabel's control.

MITIGATION · **Monitoring framework.** While macro cycles are beyond Capitabel's direct control, they materially shape the lending environment. We institutionalise a quarterly Macro Review (1 hour, founders + Thiru) anchored on the following sources: **Economic Survey** (Ministry of Finance, January annual — the deepest single macro snapshot covering growth, fiscal, inflation, external sector, jobs · indiabudget.gov.in); **Union Budget documents** — Key to the Budget + Macro-Economic Framework Statement (government spending priorities and growth assumptions); **RBI Annual Report + Monetary Policy Reports** (banking sector health, inflation trends, interest-rate outlook); **MoSPI quarterly GDP** (hard growth data, refreshed quarterly). Multi-product strategy is itself a hedge — MSME and LAP are less correlated with residential HL cycles than pure HL originators. Peri-urban and Tier 2 demand is structurally underpenetrated and less cycle-sensitive than premium urban HL. Real estate cooling, if it comes, actually improves Capitabel's relative position vs digital-first competitors whose unit economics depend on volume.

PART SEVEN

7

The bigger *picture*.

FY 2026–27 is the foundation. The structural pathway from DSA to co-lending to AIF / NBFC plays out over the subsequent three to five years – and defines where the capital comes from.

7.1 Three-year vision

7.2 Structural pathway – DSA → co-lending → AIF/NBFC

7.3 Fundraising roadmap

7.4 Investor readiness checklist

What Capitabel looks like in 2029.

By March 2029, Capitabel is the recognised phygital lending originator of South India — ₹1,000 Crores of annual disbursement, forty branches across Tamil Nadu, Andhra Pradesh, Telangana, and Karnataka, a team of 150, and a credit infrastructure that lets us operate as a Business Correspondent with two co-lending partners live on the platform.

The matching engine that ships in FY 2026–27 will have processed 100,000+ leads by FY 2028–29 and will have transcribed and contextualised tens of thousands of banker and customer conversations — an accumulating intelligence asset that no competitor can replicate without years of accumulated ground-level conversation data. We will hold direct, institutionalised relationships with twenty core lenders — the Repcos, HomeFirsts, HDFCs, ICICIs, KVBs, and two or three new NBFC partners earned through the FY 2027–28 co-lending pilot. Ruloans will still be a channel partner, but at less than 10% of volume — a tactical relationship, not a strategic dependency.

Capitabel will be registered as an AIF Category II fund manager under SEBI, having raised a first-time corpus of ₹20–50 Crores focused on peri-urban secured credit. This is our stepping stone toward an NBFC licence, which we will apply for in FY 2029–30 once the AIF track record establishes institutional credibility with RBI.

The customer-facing brand will stand for one thing: the fastest, fairest, most transparent secured credit experience in South India for borrowers that national fintechs cannot serve. The internal brand will stand for discipline — a documented Matching Engine Algorithm as proprietary IP, 10–12 core lender partners managed with institutional depth, and unit economics that compound.

By then, the business will be Series-A funded (₹25–40 Cr raised in FY 2027–28 to FY 2028–29), board-governed, and demonstrably profitable at scale. FY 2026–27 is the year this vision becomes credible to an external investor. Everything else follows from nailing it.

7.2 · Structural Pathway

GATE	CONDITION	TIMING	NEXT STRUCTURE	KEY REQUIREMENT
Gate 1	₹200 Cr annual + ₹1 Cr profit	Mar 2027	Stay DSA · begin BC exploration	None — continue existing model
Gate 2	BC licence + 2 co-lending partners live	Sep 2027	BC model + FLDG pilot	RBI BC framework · FLDG deposit ₹2–5 Cr
Gate 3	₹500 Cr run rate · RBI compliance ready	Mar 2028	Evaluate AIF Cat II (preferred) or NBFC	AIF: ₹20 Cr corpus · NBFC: ₹10 Cr NOF
Gate 4	Capital raised · structure finalised	FY 2027–28 to FY 2028–29	AIF registration or NBFC application	AIF 4–8 months · Manager holds 2.5% / ₹5 Cr min

AIF Category II (SEBI) is the preferred first step before NBFC – lighter regulatory burden, shorter registration timeline (4–8 months vs 12–18 months for NBFC), and min corpus of ₹20 Cr vs NBFC NOF of ₹10 Cr. Co-Lending Arrangements Directions 2025 (RBI, effective Jan 1 2026) expanded scope beyond priority sector – we participate as originator partner. See Annexure E.3 for full regulatory framework.

7.3 · Fundraising Roadmap

ROUND	TIMING	TARGET	INVESTOR PROFILE	USE OF FUNDS
Angel	Q3 FY 2026–27 (Oct–Dec 2026)	₹3–4 Cr / ~\$500K	Smaller VCs (Pravega, Artha, IPV, Better Capital) + 5–8 strategic angels (ex-HFC/NBFC execs, real estate angels, fintech operators)	Working capital · tech build · 4–5 strategic hires · 12-month runway through Seed close
Seed	Q1–Q2 FY 2027–28	₹8–12 Cr / \$1–1.5M	Stellaris · Blume · Pravega · Artha · BFSI seed funds	Geographic expansion · BC licence · platform · 50-person team
Series A	Mid-FY 2027–28 to early FY 2028–29	₹25–40 Cr / \$3–5M	Bertelsmann India · Elevation · Accel · Fundamentum	AIF/NBFC capital · national expansion · full platform

Round sizes, valuation framework, dilution scenarios, and working capital requirements detailed in **Annexure H · Fundraise Framework**. Pathway is Angel → Seed → Series A with ~45–50% cumulative dilution post-Series A – capital-light by design, prioritising founder equity and profitable scale over aggressive capital raises.

7.4 · Investor Readiness Checklist

Two readiness gates: **Pre-Angel (Q2 close)** for the Q3 Angel round and **Pre-Seed (Q4 close)** for the Q1–Q2 FY 2027–28 Seed round. Items required for each are tagged below.

- Matching Engine Framework complete – MSME, HL, LAP matching policies covered (Thiru). PRE-ANGEL
- Zoho CRM fully integrated with Claude–Zoho intelligence layer – 100% of files tracked digitally, zero spreadsheets. PRE-ANGEL
- Matching Engine v1 live – AI recommendations processing 40%+ of leads. PRE-ANGEL
- Investor pitch deck ready – tailored for angel audience initially; seed/Series A versions follow. PRE-ANGEL
- Governance pack complete – board resolutions, Matching Engine Framework, risk register, compliance log, regulatory posture (Annexure E.3). PRE-ANGEL
- Audited financials FY 2024–25 available; FY 2025–26 in preparation. PRE-ANGEL

- Lender panel rationalised to 15 active core relationships with negotiated commission terms. PRE-ANGEL
- ₹200 Crores annual disbursement run rate demonstrated by March 2027. PRE-SEED
- ₹1 Crore net profitability – unit economics proven, operating model sustainable. PRE-SEED
- 10–12 core lender partnerships with signed agreements and volume commitments. PRE-SEED
- Team: 20–25 people with clear roles, KPIs, and < 20% annual attrition. PRE-SEED
- Audited financials FY 2025–26 finalised. PRE-SEED

ACTION PLAN

FY 2026–27

Who does *what*, by when.

Owner-assigned milestones across four quarters, anchored by must-win battles and success metrics. Reviewed weekly, escalated monthly, recalibrated quarterly.

C Chidambaram · strategy & RE partnerships

H Harish · tech & lender network

D Devesh · partnerships & channels

T Thiru · Matching Engine Framework & governance

MUST-WIN BATTLES

1. **Nellore branch live by May 31** — first ASM, one RM, first file by June 30.
2. **Claude-Zoho integration live by May 15** — first 10 banker and customer conversations transcribed and contextualised.
3. **Matching Engine Framework approved by June 30** — HL, LAP, MSME matching policies covered.

Who	Action	By When	Success Metric
H	Activate Nellore branch — office, RM hire, builder outreach	May 31	First file from Nellore by Jun 30
C	Initiate CREDAI MSME membership application	Apr 30	Application submitted and acknowledged
C	Sign 3 developer partnerships via Sanctuary Spaces	Jun 30	3 signed MoUs with active referral pipeline
H	Claude-Zoho integration live — conversation transcription, contextual layer per product, external intelligence ingestion (lender policies, news, public filings)	May 15	10+ conversations transcribed and contextualised by month-end · zero spreadsheets
H	Matching Engine Alpha — rule-based lender selection live	Jun 30	First 5 files processed via Alpha engine
H	Website rebuilt — team page, 5 blog articles, analytics, CRM form	May 31	Live · Google Analytics connected to Zoho
D	Rationalise lender network from 40 to 20 active partners	May 31	20 agreements with core lenders via scoring framework
D	Close 2 new referral channel agreements	Jun 30	2 new channel partner agreements signed
T	Deliver Matching Engine Framework — HL, LAP, MSME matching policies	Jun 30	Board-approved framework document
T	MSME borrower-fit and lender-match standards	Jun 30	Standards ready for RM field use

MUST-WIN BATTLES

1. **Matching Engine Beta live by Sep 15** — 40% of new leads processed through engine.
2. **North Chennai cluster activated by Aug 31** — ₹2 Cr from cluster by Sep 30.
3. **Core lender panel at 15 by Jul 31** — all with 1%+ commission negotiated.

Who	Action	By When	Success Metric
C	Launch North Chennai cluster — Ponneri, Gummidipoondi, Red Hills · first RM hire	Aug 31	₹2 Cr from North Chennai by Sep 30
C	Optimise Google My Business across all 4 clusters	Jul 31	4 verified listings · 20+ reviews each
C	Formalise Joggle partnership — MoU signed	Aug 31	Signed MoU · pilot terms agreed
H	Matching Engine Beta live — 40% leads · 50+ lenders connected	Sep 15	40% of new leads via engine
H	WhatsApp Business API lead flow activated	Aug 15	First 20 leads via WhatsApp
H	MIS dashboard — all KPIs automated, zero manual decks	Jul 31	Weekly automated management report live
D	Close 2 MSME digital partnerships (Joggle + 1 other)	Sep 30	2 signed agreements · active pipeline
D	Rationalise to 15 core lenders with 1%+ commission agreed	Jul 31	15 active lenders · terms documented
T	LAP matching risk-mitigation playbook delivered	Aug 31	Playbook approved by team
T	MSME borrower-fit and lender-match standards finalised	Sep 30	Standards ready for lender negotiations
C/T	Investor pitch deck — first draft (Angel-ready)	Sep 30	Draft deck ready · 3-source review with Thiru complete
	Investor package — full pack business plan refresh + FY		Board-approved investor
T	2027–28 forecasts + target investor list with intros + talking points + FAQ	Sep 30	pack delivered for Q3 outreach

Q3 · October to December 2026

SCALE

MUST-WIN BATTLES

1. **Angel round closed by Dec 31** — ₹3–4 Cr / ~\$500K, smaller VCs + 5–8 strategic angels.
2. **Matching Engine production by Nov 30** — 60%+ leads processed, approval rate +15%.
3. **South Andhra expanded to 5 towns by Nov 30** — ₹1 Cr from expanded cluster.

Who	Action	By When	Success Metric
C	Investor pitch deck finalised — Angel-ready · 8–10 investor meetings scheduled	Oct 31	Final deck signed off by Thiru · 8+ first meetings
C	Angel round closed — ₹3–4 Cr at ₹15–20 Cr pre-money	Dec 31	Termsheet signed · funds in bank by Dec 31
C	South Andhra expanded to 5 towns — RMs hired and active	Nov 30	5 towns operational · ₹1 Cr from expanded cluster
C	Joggle embedded finance pilot live — first contractor loans	Oct 31	5 Joggle-sourced leads · 2 disbursements
H	Matching Engine production — 60%+ leads processed	Nov 30	60% leads via engine · approval rate +15%

Who	Action	By When	Success Metric
H	CRM dashboard — all RMs using daily · 100% adoption	Oct 15	Zero files outside Zoho
H	Digital KYC integration — WhatsApp document collection live	Oct 31	Document TAT cut from 5 days to 48 hours
D	QR code programme at 10 developer sites live	Oct 31	10 sites · 20+ leads/month from QR
D	YouTube — 20 videos in Tamil and Telugu published	Dec 31	20 videos · 500+ views average
T	6-month Matching Engine review and framework calibration	Dec 15	Updated framework reflecting FY 2026–27 live data
T	Angel round support — investor diligence calls, Q&A, terms negotiation	Dec 31	3 institutional + 5 strategic angel commitments closed

Q4 · January to March 2027

PROFITABILITY & READINESS

MUST-WIN BATTLES

1. **₹200 Cr cumulative disbursement by Mar 31** — profitability achieved.
2. **Seed round preparation initiated by Feb 28** — narrative refresh, FY 2027–28 forecasts ready, target investor list (Stellaris, Blume, Pravega, Artha) — 3+ first meetings.
3. **100% digital submission to all 12 core lenders by Mar 31.**

Who	Action	By When	Success Metric
C	Seed round narrative refresh — pitch deck v2 (Seed-tier investors), updated FY 2027–28 forecasts	Jan 31	Seed deck ready · FY 2027–28 plan finalised
C	Begin Seed round conversations — Stellaris, Blume, Pravega, Artha, BFSI funds — minimum 3 first meetings	Feb 28	3 first meetings done · 2 second meetings booked
C	Document BC-to-NBFC/AIF pathway with Thiru	Feb 28	Pathway document approved by founders
H	Year Two technology roadmap finalised	Jan 31	Tech roadmap approved · FY 2027–28 budget allocated
H	All 12 core lenders on digital integration — zero manual submissions	Mar 31	100% digital submission to core lenders
H	Banker relationship CRM — 100 banker contacts in Zoho	Feb 28	100 contacts · engagement tracker live
D	50 developer sites with QR code lead capture active	Mar 31	50 sites · 100+ leads/month from QR codes
D	5 MSME embedded finance partnerships active	Mar 31	₹5 Cr MSME embedded pipeline
T	Annual governance and risk review	Mar 15	Investor-grade documentation package delivered
All	₹200 Crores cumulative disbursement milestone crossed	Mar 31	Confirmed ✓ — foundation for Seed round narrative

ANNEXURES

A–K

Supporting *reference* material.

Detailed supporting documentation – competitor deep dives, hiring plan, advisory engagement, technology specs, industry benchmarks, extended risk register, cost-per-file build-up, fundraise framework, lender portfolio detail, review cadence formats, and founder & key person milestones.

A	Competitor deep dives	B	Hiring plan & salary benchmarks
C	Advisory engagement – Thiru	D	Technology specifications
E	Industry benchmarks	F	Extended risk register
G	Cost-per-file build-up	H	Fundraise framework
I	Lender portfolio detail	J	Review cadence & formats
K	Founder & key person milestones		

A.1 · BASIC Home Loan.

Founded	2020 · Gurugram · Founders: Atul Monga (ex-PolicyBazaar), Kalyan Josyula (ex-Credit Suisse, Ola), Pranav Khattar
Model	Phygital BC/DSA — automated platform + 15,000+ agent network · Home Loan focus (affordable ₹5–20 L, expanding upward)
Geography	650 districts · 10 city hubs · Tier 2 and Tier 3 India — core market
Disbursements	Cumulative ~\$1.1 Bn (~₹9,000 Cr) · FY 2024–25 target ₹15,000 Cr · FY 2024–25 revenue ₹68.2 Cr · targeting ₹25,000 Cr annually
Employees	438 (August 2025)
Funding	Seed 2021 · Series A 2022 (~\$3.5M) · Series B Sep 2024 \$10.6M (Bertelsmann India + CE-Ventures) · Total \$19.3M over 5 rounds
Growth	10× revenue growth in 24 months · AI assistant HOM-i launched Sep 2025 · Builder QR code via Navanc (Oct 2025)
Capitabel vs BASIC	BASIC: single-product HL only. Capitabel: HL + LAP + MSME. BASIC: national 650 districts. Capitabel: deep South India. BASIC: \$19.3M raised. Capitabel: pre-funding, lean, on path to profitability.

A.2 · Loan Network

Founded	2023 · Mumbai · Founders: Manish Agrawal (CEO), Praveen Khumar N (CBO), Kranti (CPTO)
Model	Digital-native DSA platform · HL + business loans · 70+ lender partnerships · Full digital: credit check to application <10 min
Key Innovation	India's first builder on-site QR code — walk-in buyer discovers right lender in 60 seconds. Navanc partnership for legal + valuation upfront. Capitabel should pilot this via Sanctuary Spaces developer relationships.
Financials	Revenue ₹2.02 Cr FY 2023–24 · 28 employees (Aug 2025) · Total \$2.15M raised · 39 investors · founders retain 81%
Capitabel vs Loan Network	Most comparable in age. Loan Network is digital-only — weaker on ground. Capitabel's phygital model handles complex cases better. QR code initiative directly actionable via Manor Group builder network.

A.3 · Optimo Capital

Founded	~2022 · Prashant Pitti (co-founder EaseMyTrip) · NBFC licence — is a lender, not an originator
Model	Digital-first LAP NBFC · LAP for MSMEs · up to ₹2 Cr · 7–15 year tenure · AI + digital land records underwriting
Funding	Series A ₹150 Cr (Oct 2025) — Prashant Pitti + Blume Ventures + Omnivore
Capitabel Angle	Partnership opportunity: Capitabel sources LAP files, Optimo lends. Optimo's digital-only model cannot handle complex cases that Capitabel's phygital approach manages.

A.4 · Ruloans

Founded	~1998 · Mumbai · Founder: Kaushik Mehta · 35,000+ DSA partners · 275+ lenders · Ruconnect App
Scale	FY22 ~₹13,000 Cr · FY23 ~₹18,000 Cr (80% YoY growth) · FY23 target ₹30,000 Cr
Relationship	CURRENT PARTNER — ₹13.68 Cr (27.3% of Capitabel total) processed via Ruloans. Continue for non-core lenders while building direct relationships. Goal: reduce to <15% by FY 2027–28 without losing volume.

A.5 · Ambak

DIRECT COMPETITOR

Founded	January 2024 · Gurugram · Founders: Raghuveer Malik (CEO, ex-PB Partners), Rameshwar Gupta (CTO, ex-Freecharge/Axis), Rashi Garg, Pranav Khattar, Ashish Lohia (alumni of Policybazaar, Paisabazaar, ZestMoney, CarDekho)
Type / Model	Tech-led marketplace for home loans & LAP · Pure originator (no own book) · 50+ lender partners · 3,000+ builder & broker network · Vernacular AI bots
Geography	35 cities targeted · Exclusive partnership with Delhi Development Authority (DDA) — 35,000+ homebuyers
Scale	15,000+ customers in first 12 months · 6 states · Targeting \$1 Bn (₹8,000 Cr+) annual disbursement FY 2025–26 · Aim: \$20 Bn over 5 years
Funding	Total \$18.1M raised over 5 rounds · Latest Series A Nov 2025 (\$7.84M) · Investors: Peak XV Partners (Surge), Z47, Advantedge, DeVC, AdvantEdge Founders
Key Innovation	AI-driven home loan matching engine · Vernacular AI bots for customer outreach · Builder-site point-of-purchase loan capture
Capitabel Angle	The single most product-aligned competitor — same HL+LAP marketplace model with AI matching. Capitabel's edge: South India ground depth (Ambak is North-heavy via DDA), MSME breadth (Ambak is HL+LAP only), and the Sanctuary Spaces builder pipeline (Ambak builds builder relationships from scratch; we have them embedded). Watch closely; potential template for Series A pitch when fundraising.

A.6 · MoneyKarma

DIRECT COMPETITOR

Founded	2015 · Hyderabad · Founders: Siddhartha Shekhar Singh, Ram Subramaniam · Stanford alumni, incubated at Stanford StartX · Led by Indian banking domain experts
Type / Model	AI-powered fintech marketplace · Originator across HL, Personal, Business loans, Credit Cards, MFs, Digital Gold, Credit Score · Builder-site loan advisor model
Geography	Pan-India digital + on-ground builder-site presence · Hyderabad HQ
Scale	1.9M+ users · 30+ bank partners · ₹500 Cr/month run rate (current) · Targeting ₹2,500 Cr/month after KarmaPro platform full-rollout · ₹10,000 Cr/month long-term aspiration · 2025 revenue ~\$5.7M
Funding	Venture-capital-backed · T-Hub (Hyderabad) graduate · Specific round detail limited in public domain
Key Innovation	KarmaPro — fully integrated digital partner platform · Builder-site Home Loan Advisor model (humans on-ground at builder locations, identical to what Capitabel can do via Sanctuary Spaces) · AI matching between customers and lender products
Capitabel Angle	The single most GTM-aligned competitor — builder-site advisors as point-of-purchase capture is exactly the play we can run via Sanctuary Spaces. Capitabel's edge: institutional lender depth via Harish & Thiru, MSME specialisation, and Andhra-Tamil Nadu peri-urban cluster focus (MoneyKarma is Hyderabad-centric and pan-India broad). Study their builder-site operating model carefully — likely the most directly transferable playbook for Capitabel's CREDAI & Sanctuary Spaces channels.

A.7 · BankBazaar

Founded	2008 · Chennai · Founders: Adhil Shetty (CEO), Arjun Shetty, Rati Shetty
Type / Model	Online financial product marketplace · Aggregator + originator · Co-branded credit card issuer (Yes Bank partnership) · Cross-sells third-party loans & insurance
Geography	Pan-India digital · 50+ bank partners · 50M+ registered users · 765 employees
Scale	FY 2024–25 revenue ₹254 Cr (loss-cutting) · FY 2023–24 revenue ₹250 Cr (claimed breakeven) · Apr 2025 entered gold loan via Muthoot Fincorp partnership
Funding	Total \$134M raised over Series D · Investors: Walden International, Peak XV Partners (Series D backer), Experian, Amazon, GUS Holdings, Eight Roads · Latest Series D Apr 2025 (₹55 Cr from Muthoot Fincorp + Walden) · Valuation ~\$217M
Key Innovation	India's earliest online comparison marketplace for financial products · Co-branded credit card breakthrough · Free credit score as customer acquisition wedge
Capitabel Angle	Chennai-based competitor at the top of the funnel — wins on volume of price-led leads, weak on personalised assisted service for complex files. Capitabel's edge: complex file handling (LAP, MSME, peri-urban informal income) where price-comparison sites fail. Possible distant lead-source partnership but not a strategic peer.

A.8 · Indifi

Founded	2015 · Gurugram · Founders: Alok Mittal (MD & CEO), Siddharth Mahanot · Lending platform for small business debt financing
Type / Model	Hybrid: own NBFC (Indifi Capital) + marketplace with 100+ lender/ecosystem partners · 100% digital · Cash-flow underwriting · Sector-specific credit products
Geography	400+ cities · 1 Lakh+ loans disbursed · Pan-India digital
Scale	Cumulative ₹4,100+ Cr disbursed · 89,000+ loans · Avg ticket ₹5 L · Profitable for 6+ consecutive quarters · FY 2022–23 maiden full-year profit ₹5.1 Cr (vs ₹32.8 Cr loss FY 2021–22)
Funding	Total \$120M+ raised · Latest Series E Jun 2023 ₹290 Cr (\$35M) led by ICICI Venture · Investors: ICICI Venture, British International Investment (BII), OP Funnfund, Omidyar Network India, Flourish Ventures, CX Partners
Key Innovation	Sector-specific credit products (e-com sellers, restaurants, travel agents, pharma, retailers) · Flipkart/Amazon seller integrations · Account Aggregator-based onboarding · Active co-lending advocate
Capitabel Angle	Direct competitor in MSME unsecured lending. Capitabel's edge: secured MSME (LAP-backed) where Indifi is unsecured-only, South India peri-urban depth where Indifi is digital-only. Indifi's sector-specific underwriting playbook is worth studying for Joggle pilot.

A.9 · Aye Finance IPO 2026

Founded	2014 · Gurugram · Founders: Sanjay Sharma (MD, ex-Ujjivan, 25+ yrs banking), Vikram Jetley · Phygital cluster-based MSME lender
Type / Model	RBI-registered NBFC · Own book (middle-layer) · Phygital model: branch network + data-driven cluster underwriting · Quasi-mortgage, hypothecation, add-on loans · ₹50K–₹10L tickets
Geography	478 branches · 18 states + 3 UTs · Diversified — no single state >15% of portfolio
Scale	AUM ₹6,028 Cr (Sep 2025) · 5.86 lakh active customers · FY 2024–25: revenue ₹1,072 Cr (+67%), profit ₹161 Cr (+198%) · Some H1 FY 2025–26 profit compression and rising NPAs (4.21% gross)
Funding	Total ₹1,250 Cr+ raised pre-IPO · Investors: A91 Partners, CapitalG (Google), LGT Lightstone, MAJ Invest, ABC Impact, BII · IPO Feb 2026 ₹1,010 Cr at ₹3,184 Cr valuation · Anchor: Nippon, Goldman Sachs, HDFC Life
Key Innovation	Cluster-based lending — groups of similar businesses in specific geographies for risk pattern recognition · Tech-enabled phygital model (branch + digital underwriting) · Now public
Capitabel Angle	Operational template for cluster-based MSME phygital lending — exactly what Capitabel will build at scale. Aye is direct lender (NBFC), Capitabel is originator → potential lender partner for MSME files in our clusters. Their public listing also creates a benchmark for valuation conversation when Capitabel raises Series A.

A.10 · FlexiLoans

Founded	2016 · Mumbai · Founders: Deepak Jain, Ritesh Jain, Manish Lunia · MSME-focused digital lending NBFC
Type / Model	Digital lending NBFC · Own book + 25+ lender partner integrations · 100% digital sourcing · Zero branches · Embedded finance leader · 150+ ecosystem partnerships
Geography	2,100+ towns & cities · 66% customers in Tier 2/3+ · 614+ employees
Scale	AUM \$277M (~₹2,300 Cr) · Cumulative disbursement \$1.2 Bn (~₹10,000 Cr) · 50,000+ MSMEs served · 170k+ loans · Profitable 3 consecutive years · 83% CAGR FY 2021–22 to FY 2024–25 · Targeting ₹4,000–5,000 Cr AUM next 12–18 months
Funding	Total \$192M raised over 10+ rounds · Latest Series C Jun 2025 ₹375 Cr (~\$45M) — total \$80M raised in 6 months · Investors: WestBridge / BII (lead), Accion, Nuveen, Fundamentum, Maj Invest, Fasanara, Sanjay & Falguni Nayar
Key Innovation	48-hour disbursement model · Embedded finance ecosystem leader · 4M+ digital leads/month · AI-driven underwriting
Capitabel Angle	Lender partner opportunity for MSME files (Capitabel sources, FlexiLoans lends). Their digital-only model means they cannot serve borrowers needing on-ground hand-holding — exactly the gap Capitabel addresses. Study their ecosystem partnerships model for Joggle and other embedded finance plays.

A.11 · Lendingkart

Founded	2014 · Ahmedabad · Founders: Harshvardhan Lunia (CEO), Mukul Sachan (left 2019) · Tech-led MSME NBFC
Type / Model	RBI-registered NBFC · Now 90% co-lending (started as direct lender, pivoted) · Cash-flow underwriting · 5,000+ data points per credit decision · 20+ co-lending partners
Geography	4,000+ cities · 280,000+ business loans disbursed · 200,000+ customers
Scale	₹18,000+ Cr cumulative disbursed · Avg ticket ₹7–8 L · Targeting IPO in 18–24 months · Recent Series E March 2025 (₹ undisclosed)
Funding	Total \$260M raised over 31 rounds · Co-lending partners: Punjab National Bank, Canara Bank, Bank of Maharashtra, IDFC First, Aditya Birla, U Gro · Equity investors: Fullerton Financial Holdings, Bertelsmann, Mayfield, Saama Capital, Sistema Asia, India Quotient, State Bank · Acquired Upwards & Kountmoney
Key Innovation	Pioneer of NBFC co-lending model · 2gthr SaaS platform for bank-NBFC origination · Cash-flow-based underwriting at scale
Capitabel Angle	Co-lending playbook is the FY 2027–28 path for Capitabel (per Gate 2 in §7.2 Structural Pathway). Lendingkart's 90% co-lending mix is the benchmark and target operating model. Avg ticket ₹7–8 L is in our MSME band — direct competitor in unsecured MSME, partner-template in co-lending.

A.12 · Prayaan Capital

SOUTH INDIA PEER

Founded	December 2018 · Chennai · Founders: Madhan Mohan (MD), Akash Chelvam · Both seasoned bankers (ex-RBL, Fullerton, Vistaar) · MD Rangarajan Krishnan (ex-Five Star Business Finance CEO) acquired controlling stake Feb 2026
Type / Model	RBI-registered NBFC · Own book · Phygital "tech & touch" model · Brick-and-mortar branches + digital tools · Long-term secured loans (mortgage of CRE/residential property) + short-term unsecured working capital
Geography	South India focus — Tamil Nadu (6 branches at seed stage), expanding to Andhra, Telangana (Mancherial branch added) · Manufacturing + services MSMEs + Tier 3/4 traders
Scale	Early-scale post-Series A · ₹8 Cr disbursed at seed stage (2020) · Targeting "neighbourhood lender" positioning · Range: \$1.5K – \$30K (₹1.25 L – ₹25 L) per loan · Plans manufacturing, trading, services MSME expansion
Funding	Series A Feb 2026 ₹110 Cr (\$12.1M) led by Peak XV Partners (also backs Five Star Business Finance) · Seed Feb 2020 \$1.2M led by Accion Venture Lab
Key Innovation	"Neighbourhood lender" positioning · Phygital "tech & touch" branch model (very similar to Capitabel's vision) · Rangarajan's Five Star scaling expertise now applied here · Both secured (LAP) and unsecured products
Capitabel Angle	The single most direct South India MSME peer. Same geography (Chennai HQ → TN, AP, TG expansion), same phygital philosophy, same MSME secured + unsecured product mix. Two strategic implications: (1) Potential lender partner — Capitabel originates files Prayaan can fund on its own book, especially MSME secured/LAP in our clusters. (2) Watch closely as direct competitor for the same Tier 2/3 South India borrowers. Rangarajan's Peak XV connection also gives a possible Series A pathway map.

A.13 · CredRight

Founded	2016 · Hyderabad · Founders: Neeraj Bansal (CEO), Vineet Jawa, Vamsi Krishna · Specialised MSME fintech lender
Type / Model	Digital lending platform · Own NBFC book · Niche specialisation: collateral-free MSME loans to micro/small businesses that subscribe to chit funds · Cash-flow underwriting via chit-fund subscription history
Geography	Telangana HQ (Hyderabad) · South India focus · Pan-India digital reach
Scale	Series B stage (Aug 2025) · 340 active competitors per Tracxn — early-scale
Funding	Total \$26.2M raised · Latest Series B Aug 2025 (~\$ undisclosed) · Investors: YourNest, Spearhead Capital, Accion, 9Unicorns
Key Innovation	Chit-fund-data-based underwriting — extracts cash flow signal from a uniquely Indian financial product (chit funds) that traditional credit bureaus don't capture · Enables lending to credit-thin borrowers
Capitabel Angle	Niche player in a specific segment (chit-fund-active MSMEs). Low direct overlap. Potential cross-referral relationship — Capitabel can refer chit-fund-active borrowers needing additional credit; CredRight may refer borrowers needing HL or LAP outside their unsecured product. Worth a Q3 FY 2026–27 conversation given South India geography overlap.

A.14 · Stride One

Founded	2021 · Gurugram · Founders: Ishpreet Singh Gandhi (CEO), Abhinav Suri (COO), Sameer Mahajan · Tech-led NBFC from the founders of Stride Ventures (India's award-winning venture debt fund)
Type / Model	RBI-licensed NBFC · Own book · Specialised in startup ecosystem & supply chain finance · Anchor-led model: lends to MSMEs in startup supply chains (vendors, gig workers, contractors of large startup "anchors") · Vendor finance, receivable finance, invoice discounting
Geography	Pan-India · Notable anchor partners: FarMart (agriculture), Ace Turtle (retail tech), beauty & personal care brands
Scale	AUM ₹200 Cr at seed (May 2022) · 141 employees (May 2025) · Series B stage · FY 2023–24 revenue ₹58.9 Cr
Funding	Total \$59M raised over 9 rounds · Investors: Whiteboard Capital, Matrix, WaterBridge, Elevar Equity (lead seed) · 11 institutional + 45 angel investors · Founders own 75.9%
Key Innovation	Anchor-led MSME lending — uses startup ecosystem data (transaction flows between anchor and vendor) for underwriting · Embedded finance for startup ecosystems
Capitabel Angle	Different niche — startup ecosystem/supply chain MSMEs versus Capitabel's TN/AP traditional MSMEs. Low direct overlap. Monitor for cross-referrals if Capitabel encounters borrowers in startup supply chains. Their anchor-led model is a useful template if Capitabel pursues Joggle-style ecosystem partnerships.

A.15 · Easy Home Finance

Founded	2017 · Mumbai · Rohit Chokhani (MD) · Affordable Housing Finance Company (HFC) · Registered with National Housing Bank (NHB)
Type / Model	Affordable HFC · Own book + DCB Bank instant home loan partnership · Targets "missing middle" — first-time homebuyers in peripheries of Mumbai, Bengaluru · Same-day origination-to-disbursement claim · 25% files via government partnerships · 75% via brokers/aggregators
Geography	Currently Mumbai, Bengaluru, Maharashtra · Plans 150+ locations · Yavatmal expansion underway
Scale	500 employees · ₹500+ Cr facilitated through third-party lenders · ~5,000 families housed · FY 2023–24 revenue ₹63.7 Cr (+90% YoY) · Profitable (10.8% PAT growth) · Targeting \$300M AUM in 24 months · Avg loan ₹10–50 L
Funding	Total \$60.1M raised · Latest round \$35M led by Ranjan Pai's family office (Claypond Capital) + Sumitomo Mitsui Banking Corporation Asia Rising Fund · 16 investors include Aart, B2V Ventures, Daiwa SMBC Capital, Incubate Fund Asia
Key Innovation	Same-day "loan origination to moving in" claim · Tech + paperless documentation · DCB Bank partnership for instant HL · Government scheme integration
Capitabel Angle	Lender partner opportunity — Capitabel originates affordable HL files (₹10–50 L band, peri-urban borrowers) that fit Easy Home Finance's sweet spot. If they expand to TN/AP, immediate partnership conversation. Their 25% government-scheme sourcing is also a model worth studying for PMAY-linked HL leads in our clusters.

A.16 · KreditBee UNICORN

Founded	2016 · Bengaluru · Founders: Madhusudan Ekambaram, Karthikeyan Krishnaswamy, Vivek Veda · Operates via in-house NBFC Krazybee Services
Type / Model	Full-stack digital lending platform · Own book NBFC + 12+ partner lenders · Started in unsecured personal loans, now expanding into LAP, business loans , two-wheeler loans, UPI · ~50 sales offices for secured products
Geography	Pan-India digital · LAP available in major South India cities (mentioned explicitly on app)
Scale	\$1.5 Bn AUM (Mar 2026) · 18M+ unique loan customers · 230M+ app downloads · 60M+ loans disbursed cumulatively · 10M+ active customers · 15,000+ loans/day · Q3 FY 2025–26 operating revenue ₹805 Cr · Net profit ₹137 Cr · Pre-IPO
Funding	Unicorn at \$1.5B valuation · Series E Apr 2026 \$280M (last private round before IPO) led by Motilal Oswal Alternates, Hornbill Capital, Dragon Funds · Earlier: Advent International (Series D), Premji Invest, ICICI Bank, MUFG, Mirae Asset, NewQuest · Total raised \$700M+
Key Innovation	Full-stack lending platform · LAP up to ₹1 Cr at 12% with 20yr tenure · Generative AI investments for credit decisioning · UPI integration · Moving domicile to India ahead of IPO
Capitabel Angle	Emerging direct competitor in unsecured personal/MSME and now expanding into LAP. Pure-digital model — no on-ground capability for complex peri-urban or high-touch files. Capitabel's edge: complex file expertise + South India geography depth. KreditBee's IPO path is also a market-comparable for Capitabel's eventual Series A/B narrative.

Founded	2015 · Bengaluru · Founders: Rajat Deshpande (CEO), Anant Deshpande, Nikhil Bhawsinka, Srijan Nagar · Operates as Moshpit Technologies Pvt Ltd · Originally GoPigeon team (acquired by Narvar 2017)
Type / Model	Credit infrastructure SaaS — NOT a lender or originator · API-first operating system for digital lending · Modules: loan origination (Journey Studio), AI credit decisioning (Sentinel BRE), risk intelligence (BankConnect, DeviceConnect, KYC), embedded finance (Prism), fraud intelligence · AI-native platform
Geography	India HQ Bengaluru · Gurugram & HSR Layout offices · Expanding internationally (SE Asia)
Scale	Powers 100+ lenders · Customers include HDFC Bank, Kotak Mahindra, Poonawalla Fincorp, Aditya Birla Capital, Muthoot Fincorp, Tata Capital · Major partnerships: IIFL Finance, Housing.com (instant loans up to ₹10L), Capital Now
Funding	Total \$51.1M raised over 4 rounds · Latest Series B Sep 2025 \$40M led by WestBridge Capital · Earlier: A91 Partners (Series A \$15M, 2022), Aditya Birla Ventures, Flipkart Ventures, Arali Ventures, IIFL Finance
Key Innovation	Modular full-stack lending API · 3-day credit product launch via Journey Studio · BankConnect Score (proprietary score from bank statement analysis) overlaid on bureau scores · Sentinel AI for real-time decisioning
Capitabel Angle	Vendor / partnership opportunity, not competitor. FinBox builds the rails Capitabel can use — Bank statement analysis API for income verification (especially MSME informal earners), credit decisioning APIs, KYC/KYB modules. Could materially accelerate the Matching Engine build (Annexure D, Phase 1–2). Worth a Q1 FY 2026–27 evaluation call. Their Housing.com partnership is also instructive — same model Capitabel could replicate at scale.

Twelve roles across the year.

ROLE	LOCATION	HIRE BY	SALARY (LPA)	PRIMARY KPI
Senior RM — Home Loans	Chennai	Q1 Apr	5–7	₹8 Cr HL disbursements / year
MSME Sales Manager	Chennai	Q1 Apr	6–9	₹12 Cr MSME disbursements / year
ASM — Nellore	Nellore	Q1 May	5–7	₹20 Cr Nellore cluster annual target
RM (×2) — South Andhra	Sullurpeta / Naidupeta	Q1 May	3–4 each	₹5 Cr each per year
Credit & Ops Executive	Chennai HQ	Q1 Jun	4–5	File quality · TAT < 5 days to sanction
RM — North Chennai	Ponneri / Red Hills	Q2 Jul	3–4	₹10 Cr North Chennai annual target
Digital Marketing Executive	Chennai HQ	Q2 Jul	3–5	50+ qualified digital leads per month
Customer Service Executive 2	Chennai HQ	Q2 Aug	3–4	NPS > 80 · query TAT < 4 hours
Lender Relations Manager	Chennai HQ	Q3 Oct	7–9	Deep relationships with 10–12 core lenders
Technology Associate — Zoho	Chennai / Remote	Q3 Oct	5–7	Matching Engine v1 live by Dec 2026
Senior RM — Chennai expansion	Chennai	Q4 Jan	5–7	₹15 Cr H2 FY 2026–27 target
2× RMs — New Geographies	TBD	Q4 Feb	3–4 each	Seed new geographies for FY 2027–28 expansion

Total new hires FY 2026–27: 12 roles. Combined with existing 7-person team and founders, exit headcount: 20–22. Attrition target: < 20% annual.

B.2 · Salary Benchmarks

ROLE	BASE LPA	INCENTIVE STRUCTURE	BENCHMARK NOTES
Relationship Manager	₹3–5	0.05–0.10% of disbursements above monthly target	HomeFirst/Repco benchmark · entry ₹3, experienced ₹5
Area Sales Manager	₹5–8	0.10% of cluster disbursements above quarterly target	Bajaj Housing Finance ASM level

ROLE	BASE LPA	INCENTIVE STRUCTURE	BENCHMARK NOTES
Regional Manager	₹7-10	0.12-0.15% of region disbursements	Full cluster P&L + hiring + attrition accountability
MSME Sales Manager	₹6-9	0.10-0.15% on MSME above ₹3 Cr / quarter	Higher commission reflects ticket size and complexity
Credit & Ops Executive	₹4-5	Quality bonus ₹5,000-10,000/month on zero-error TAT	Non-sales · quality and speed metrics only
Lender Relations Manager	₹7-9	Strategic quarterly bonus on new lender onboarding	Senior hire · critical for FY 2026-27 lender consolidation
Digital Marketing Exec	₹3-5	₹500 per qualified lead above 30 per month	Performance-linked digital channel bonus

Thiru.R · terms.

Retainer	₹2 Lakhs/month total · ₹1 Lakh fixed (payable 1st of month) + ₹1 Lakh variable (on milestone delivery)
Duration	6 months initially (Apr 2026 – Sep 2026) · extension by mutual agreement based on outcomes
Equity	Initial equity participation with clear path to increase · linked to milestones and 2–3 year continued involvement
Engagement	Minimum 2–3 days on-ground in Chennai per month · remote-first otherwise · weekly structured call with founders
Philosophy	Implementation-focused, not advisory-theoretical. All deliverables quantifiable and time-bound. "Mentoring" without outputs does not qualify for variable pay.

C.2 · Variable Pay Schedule

Total variable pay over the 6-month engagement: **₹6 Lakhs** (₹1 Lakh per month × 6 months). All triggers are on delivery — except hiring (post-60 days of joining) and lending partnerships (on first disbursement). Detailed breakdown below.

STRATEGIC DELIVERABLES — ₹1,70,000

Q	DELIVERABLE	AMOUNT	TRIGGER	SUCCESS METRIC
Q1	Matching Engine Framework — HL, LAP, MSME matching policies, including borrower-fit and lender-match matrix as a single integrated framework	₹50,000	On delivery	Framework document delivered, ready for RM field use; matrix configured in Zoho fields
Q2	LAP matching risk-mitigation playbook (Kinara experience)	₹30,000	On delivery	Playbook finalised and adopted across LAP file processing
Q2	Investor package — full investor pack: business plan refresh, FY 2027–28 forecasts, target investor list with intros, talking points, FAQ doc — ready for Q3 Angel outreach	₹30,000	On delivery	Board-approved investor pack delivered, ready for outreach
Q3	6-month Matching Engine Review & framework calibration	₹30,000	On delivery	Updated framework reflecting actual FY 2026–27 portfolio data and lender experience
Q3	Angel round support — investor diligence calls, Q&A coordination, terms negotiation	₹30,000	On Angel close	Angel round closed (₹3–4 Cr) with 3+ institutional + 5+ angel commitments

Q	DELIVERABLE	AMOUNT	TRIGGER	SUCCESS METRIC
Q4	Annual governance & risk review — investor-ready governance pack	₹20,000	On delivery	Board-ready governance documentation complete
Q4	BC-to-NBFC/AIF pathway recommendation — documented	₹10,000	On delivery	Pathway document approved by founders for FY 2027-28 planning
Strategic deliverables subtotal		₹1,70,000		

HIRING & ONBOARDING ACCOUNTABILITY — ₹2,20,000

Thiru is the directly-accountable owner for **every hire across FY 2026-27** — RM, ASM, Senior RM, Credit & Ops, Customer Support, Lender Relations, Digital Marketing, Technology Associate. Variable pay is triggered **60 days post-joining**, by which point the hire should be productive. Thiru's accountability covers: pre-hire pipeline, interview support, offer negotiation, training programme, KPI definitions, SOPs, hand-holding, and 60-day performance check.

HIRE TIER	ROLES (PER ANNEXURE B)	PER HIRE	COUNT	SUBTOTAL	TRIGGER
Senior	ASM Nellore · Lender Relations Manager	₹25,000	2	₹50,000	Post-60 days
Mid-level	MSME Sales Manager · Senior RM Home Loans · Senior RM Chennai expansion · Technology Associate (Zoho)	₹20,000	4	₹80,000	Post-60 days
Entry-level	2× RMs South Andhra · RM North Chennai · Credit & Ops Executive · Digital Marketing · 2× RMs new geographies (Q4)	₹15,000 (most) ₹10,000 (Customer Service Exec 2)	7	₹90,000	Post-60 days
Hiring subtotal — 12 hires			12	₹2,20,000	

Hiring is the single largest weight bucket (~37% of variable pay) — reflecting that institution-building velocity is the most important contribution Thiru makes during the 6-month engagement. Post-60-day trigger ensures hire isn't just signed but operating productively. Failure to make a quarter's hires (per Annexure B Q1-Q4 plan) reduces variable pay proportionately.

LENDING PARTNERSHIPS — ₹90,000

Q	DELIVERABLE	PER PARTNER	SUBTOTAL	TRIGGER
Q2-Q3	Facilitate at least 3 new lending partnerships from Thiru's NBFC/fintech network — signed agreements + first file disbursed	₹30,000	₹90,000 (3 partners)	On first disbursement per partner

DIGITAL SOURCING PARTNERSHIPS — ₹60,000

Distinct from lending partnerships. These are partnerships that drive **committed lead volume** into Capitabel — embedded finance integrations (Joggle-style), marketplace deals (real estate / construction / business platforms), or ecosystem distribution plays. Thiru's network and credibility help accelerate origination conversations with these counterparties. See §5.1 Channel 3.

Q	DELIVERABLE	PER PARTNER	SUBTOTAL	TRIGGER
Q2-Q4	Facilitate at least 3 new digital sourcing partnerships — embedded finance, marketplace, or ecosystem deals with defined lead-volume commitments. Joggle is the lead Q2 candidate	₹20,000	₹60,000 (3 partners)	On first qualified lead delivered to Capitabel via partner

TECHNOLOGY ROADMAP OVERSIGHT — ₹60,000

Thiru holds **governance accountability** for the Matching Engine build (Annexure D Phase 1, 2, 3). Harish remains the build owner; Thiru's role is "did the milestone land on time, with the right specs, ready for the team to use?" Variable pay is triggered when each Phase milestone is signed off as production-ready by founders.

Q	DELIVERABLE	AMOUNT	TRIGGER
Q1	Phase 1 Intelligence Layer milestone — Claude-Zoho integration live, conversation transcription operational, first 10 conversations contextualised across HL/LAP/MSME projects	₹20,000	On Phase 1 sign-off
Q3	Phase 2 Matching Algorithm milestone — Engine in production, 60%+ leads flowing through, network expansion module surfacing candidate lenders	₹20,000	On Phase 2 sign-off
Q4	Phase 3 Lender Interface launch — customer portal live, banker CRM operational, Account Aggregator integration kickoff	₹20,000	On Phase 3 launch
Tech oversight subtotal		₹60,000	

TOTAL VARIABLE PAY

BUCKET	AMOUNT	WEIGHT
Strategic deliverables (6 items: framework, playbook, reviews, investor pack, pathway, governance)	₹1,70,000	28%
Hiring & onboarding accountability (12 hires across FY 2026-27, post-60 days)	₹2,20,000	37%
Lending partnerships (3 new partners, on first disbursement)	₹90,000	15%
Digital sourcing partnerships (3 new partners, on first qualified lead)	₹60,000	10%
Technology roadmap oversight (Phase 1, 2, 3 milestones)	₹60,000	10%
TOTAL — to be paid as ₹1 Lakh / month variable	₹6,00,000	100%

Variable pay is paid out monthly at ₹1 Lakh — drawing down against the deliverable buckets above. If a quarter's deliverables fall short of the planned drawdown, the residual carries forward but the engagement is reviewed at month 4 with the option to re-scope or end the engagement. Hiring, lending-partnership, and digital-sourcing-partnership triggers are time-lagged by their nature (post-60 days, on first disbursement, on first qualified lead) — Thiru and the founders maintain a shared running tally month-by-month.

The Matching Engine, in three phases.

The Capitabel Matching Engine is the proprietary intelligence stack that produces the Capitabel Loan Offer. It comprises three integrated layers: **(1) the Claude-Zoho intelligence layer** – conversation transcription, contextual memory per product, external data ingestion; **(2) the matching algorithm** – Thiru's framework codified into product-by-product matching policies; and **(3) the lender interface** – direct API integrations with core panel banks. Together, these reduce RM decision time from hours to minutes, and reduce time-to-Loan-Offer from seven days to forty-eight hours.

WHY THE MATCHING ENGINE IS CAPITABEL IP

It learns from every conversation we have.

Every banker call, every customer meeting, every credit conversation is transcribed, contextualised, and saved to the relevant product project (HL, LAP, MSME) within Claude. Layered onto this: lender underwriting policies, external news on lender positioning, NPA trends, public filings, management interviews. The result is a continuously improving system that no competitor can replicate without years of accumulated ground-level conversation data. **This is the moat.**

D.1 · Current State

Zoho CRM is in active use for basic pipeline tracking, but is not configured for DSA-specific workflow, product types, geography, or commission tracking – and has no intelligence layer integrated. Website capitabel.com: operational but blog incomplete (Lorem ipsum), no team page, no analytics, no CRM attribution. Microsoft backend: document storage only – no CRM integration. No digital KYC, e-signature, or document collection portal. No matching engine – all lender selection is manual RM judgment. No MIS dashboard – all management reporting is manual Excel. No banker CRM – lender relationship data lives in founders' heads. No conversation-capture infrastructure – institutional knowledge of every banker meeting and customer call is lost the moment the call ends.

D.2 · Phase 1 – Intelligence Layer (Q1-Q2, Apr-Sep 2026) · Budget ₹11-18 L

The Claude-Zoho integration is the foundation of the Matching Engine. Phase 1 builds the data and intelligence substrate that Phase 2's matching algorithm will run on.

INITIATIVE	BUDGET	OUTCOME & OWNER
CLAUDE-ZOHO INTELLIGENCE LAYER · CORE IP BUILD		

CAPITABEL · FY 2026-27 BUSINESS PLAN · CONFIDENTIAL55

INITIATIVE	BUDGET	OUTCOME & OWNER
Conversation capture & transcription — every banker call, customer meeting, credit conversation transcribed and tagged to file/lender/product	₹2–3 L	100% of qualifying conversations transcribed by end Q2 · Harish
Contextual project structure — three Claude projects (HL, LAP, MSME) accumulating conversation memory, organised by lender, borrower archetype, and outcome	₹1–2 L	Three projects live · context retrievable by RM in 30 seconds · Harish
External intelligence ingestion — lender underwriting policies, news commentary on lender NPA / product growth / sector exposure, annual reports, management interviews from public domain	₹2–3 L	Monthly automated refresh per core lender · Harish + Devesh
Zoho CRM full configuration: stages, product types, geography, lender fields, commission tracking — integrated bidirectionally with Claude	₹1–2 L	100% files tracked · zero spreadsheets · Harish
SUPPORTING INFRASTRUCTURE		
Website rebuild: team page, 10 SEO articles, lead funnel, Google Analytics, CRM integration	₹3–5 L	50+ organic leads/month by Q2 · Harish + Digital Marketing hire
WhatsApp Business API: automated lead intake, document checklist, milestone updates	₹1–2 L	20 leads/month via WhatsApp by Q2 · doc TAT to 48 hours · Harish
MIS dashboard: disbursements, TAT, team KPIs, commission forecast vs actuals	₹2–3 L	Weekly automated report · zero manual decks · Harish
CIBIL API integration: real-time credit score pull from Zoho	₹2–3 L	Credit score in CRM in 2 minutes of lead creation · Harish

D.3 · Phase 2 — Matching Algorithm (Q2–Q3, Jul–Dec 2026) ·

Budget ₹13–20 L

The matching algorithm is fed by the Claude–Zoho intelligence layer. It produces the Capitabel Loan Offer in 48 hours and surfaces both core-panel matches and candidates for network expansion.

INITIATIVE	BUDGET	OUTCOME & OWNER
Matching Algorithm v1 — borrower profile + Claude–Zoho contextual layer + lender intelligence → top 3 lender recommendations ranked by borrower fit (approval probability, rate, TAT, fees). For each match, engine surfaces routing options : direct vs channel partner with payout comparison. Channel-premium >25 bps triggers management review rather than auto-routing (§5.2 Step 4). Non-core lenders surfaced as alternatives where they better serve a specific borrower	₹6–9 L	RM decision time 2h → 5 min · Capitabel Loan Offer in 48h · approval rate +15% · % Direct ramps 75% → 85% · Harish
Network expansion module — algorithm surfaces candidate lenders <i>outside</i> the current core panel based on observed borrower-profile gaps and external intelligence signals	₹2–3 L	3+ candidate lenders surfaced per quarter for evaluation · feeds Lender Rationalisation Framework (§5.2) · Harish + Devesh
Lender knowledge base — structured policy data for all 12 core lenders, refreshed via Claude–Zoho intelligence layer	₹2–3 L	Algorithm powered by live current policies · Devesh + Harish
Client priority module — borrower selects rate vs TAT vs fees vs tenure as primary preference	Included	Differentiated UX · higher conversion · Harish
Digital document collection portal: secure upload, checklist, e-signature	₹3–5 L	Paperless lead-to-submission · TAT cut 60% · Harish

D.4 · Phase 3 — Lender Interface & Scale (Q4 FY 2026–27 – FY 2027–28) · Budget ₹33–48 L

INITIATIVE	BUDGET	OUTCOME
Customer-facing portal: online application, document upload, real-time tracker, NPS survey	₹15–20 L	Reduce RM workload on routine cases 40% · scale without linear headcount growth
Banker CRM module — integrated with Claude–Zoho intelligence layer · contact database with bank, designation, geography, product expertise, last interaction, pipeline, conversation history	₹3–5 L	Retain institutional memory · systematic lender relationship management · founder-independent
Account Aggregator (AA) integration: consent-based income verification for informal earners	₹5–8 L	Enable lending to informal income borrowers · competitive edge in peri-urban MSME
Lender API integrations: direct connections with 5–6 core lenders for same-day in-principle sanction	₹10–15 L	Reduce sanction TAT from 5 days to same-day for digitally-ready lenders

Industry reference data.

E.1 · HomeFirst Finance — Key Operational Benchmark

AUM	₹12,712 Cr FY 2024–25 (31.1% YoY growth) · target ₹20,000 Cr by 2027 · ₹35,000–40,000 Cr by 2030
Annual Disbursements	₹4,805 Cr FY 2024–25 (21.2% YoY growth)
Product Mix	83% individual housing loans · avg ticket expanding as property values and incomes rise
Network	155 branches · 361 touchpoints · contiguous expansion strategy — does not skip geographies
Technology	Digital-first underwriting · tab-based field operations for RMs · NACH-based collections
Relevance	Target lender partner AND operational benchmark. Branch-led model with 361 touchpoints is a scaled version of what Capitabel is building. RM salary structure (₹3–5 LPA) directly benchmarks Capitabel's FY 2026–27 hiring plan.

E.2 · DSA Commission Rate Benchmarks — FY 2026–27

PRODUCT	MARKET RANGE	CAPITABEL TARGET	NOTES
Home Loan — New Purchase	0.40–0.75%	0.50–0.75%	Private banks higher than PSU · HDFC/ICICI ~0.50% · Repco/HomeFirst 0.75–1.0%
Home Loan — Balance Transfer	0.30–0.50%	0.40–0.50%	Lower commission — borrower already credit-assessed
Loan Against Property	0.75–1.50%	1.00–1.50%	Higher commission reflects complex underwriting
MSME / Business Loan	1.00–2.00%	1.00–1.50%	Highest rates · deal complexity justifies premium
Blended Target FY 2026–27	—	1.20–1.40%	Based on product mix shift toward MSME + LAP

E.3 · Regulatory Framework Summary

STRUCTURE	REGULATOR / REQUIREMENT	KEY NOTES
DSA (Current)	RBI BC Framework · updated Jul 2026	New BC classification effective Jul–Sep 2026 — ensure compliance before October 2026
FLDG	RBI Digital Lending Guidelines 2022	Capitabel provides FLDG to lenders on originated portfolios — opens co-lending revenue. Deposit typically 5–10% of guaranteed portfolio. Gate 2.
Co-Lending	RBI Co-Lending Directions 2025 (eff Jan 1 2026)	Expanded scope beyond priority sector — Capitabel participates as originator partner · Gate 2 (Sep 2027)
NBFC Licence	RBI · Min net owned funds ₹10 Cr	More onerous than AIF. Requires CIBIL membership, audited financials, fit-and-proper. Timeline 12–18 months.
AIF Category II PREFERRED	SEBI AIF Regs (amended 2025) · min corpus ₹20 Cr · min investor ticket ₹1 Cr	SEBI regulated — significantly lighter than RBI/NBFC. Manager holds 2.5% / ₹5 Cr min. Registration 4–8 months. Preferred first step before NBFC.

E.4 · Target Investor List

Investors mapped to fundraise stage and check-size band. Detailed valuation framework and dilution math in Annexure H.

INVESTOR / FUND	ROUND FIT	TYPICAL CHECK	WHY RELEVANT
ANGEL — Q3 FY 2026-27 (₹3-4 CR ROUND)			
Inflection Point Ventures (IPV)	Angel/Pre-Seed	₹1-4 Cr	24,000+ angel platform · ₹1,200+ Cr deployed · backed Roopya (lending SaaS Feb 2026)
Better Capital	Pre-Seed/Angel	₹1-3 Cr	Vaibhav Domkundwar · India fintech early-stage · backs lending platforms
Pravega Ventures (smaller end)	Angel/Seed	₹2-4 Cr	South India-based · TN/AP geography fit · fintech interest
Artha Venture Fund	Angel/Seed	₹1-3 Cr	Impact and fintech mandate · financial inclusion · South India geography
Domain Angels (ex-HFC/NBFC execs)	Angel	₹25 L-1 Cr each	Strategic value: lender introductions + regulatory network + credibility
Real Estate Angels (CREDAI)	Angel	₹25 L-1 Cr each	Builder community: referral pipeline + embedded demand access
SEED — Q1-Q2 FY 2027-28 (₹8-12 CR ROUND)			
Stellaris Venture Partners	Seed/Series A	\$2.4M avg seed (~₹20 Cr)	\$300M Fund III · BFSI/fintech focus · backed Propelld (lending) · 60% inception-stage
Blume Ventures	Seed/Series A	\$2M avg seed (~₹17 Cr)	India's largest homegrown early-stage VC · backed Slice (lending unicorn) · Fund V launching
Pravega Ventures (full size)	Seed	₹5-8 Cr	South India presence · TN/AP geography advantage
SERIES A — MID-FY 2027-28 TO EARLY FY 2028-29 (₹25-40 CR ROUND)			
Bertelsmann India Investments	Series A/B	₹30-100 Cr	Led BASIC Home Loan Series B · deep fintech lending thesis · directly understands DSA-marketplace model
Elevation Capital (SAIF)	Series A	₹20-80 Cr	Large fintech portfolio · India-first · strong BFSI executive network
Accel India	Series A	₹20-100 Cr	Largest India-focused VC · broad fintech portfolio · proven follow-on investor
Fundamentum Partnership	Series A	₹15-50 Cr	Nandan Nilekani-backed · Digital India thesis · fintech inclusion focus · backed FlexiLoans
Peak XV Partners (Surge follow-on)	Series A	₹30-100 Cr	Backed Ambak (direct competitor) and Prayaan Capital (South India MSME peer) — sector conviction

Extended risk & mitigation detail.

Summary of each risk, current level, and FY 2026–27 mitigation ownership. Updated quarterly by founders with Thiru's governance input. Scored Likelihood × Impact on a 1–5 scale; residual score reflects post-mitigation position.

RISK	LIKELIHOOD	IMPACT	RESIDUAL	OWNER	PRIMARY MITIGATION ACTION (FY 2026–27)
Ruloans concentration	3	4	High	Devesh	Direct lender panel build · reduce to <15% by FY 2027–28
Repco dependency	2	4	Medium	Devesh	Signed volume commitment · diversify peri-urban HL to Canara, HomeFirst
Commission thesis underdelivery	3	5	High	Harish	Monthly yield tracking · scale volume contingency · Thiru's lender negotiations
RBI BC framework adverse	2	4	Medium	Harish / Thiru	Pre-Oct 2026 compliance audit · scenario plan documented
MSME ramp underperformance	3	4	Medium	Devesh	Thiru network lender intros · CREDAI MSME · Joggle embedded finance
Technology delay (matching engine)	3	3	Medium	Harish	Phased build — Alpha Q1, Beta Q2, Prod Q3 · vendor fallback identified
Key-person / founder loss	1	5	Medium	All	Documented SOPs · Matching Engine Framework · banker CRM · Thiru knowledge transfer
Hiring velocity shortfall	3	3	Medium	Chidu	Pipeline of 3 candidates per open role · Thiru network intros · competitive comp
Team attrition	2	3	Low	Chidu	Incentive structure · clear KPIs · quarterly 1:1s · culture investment
Commission receipt delays	2	2	Low	Devesh	30-day SLA tracking · escalate at 45 days · legal letter at 60
Biophile disclosure challenge	1	3	Low	Chidu	Transparent disclosure throughout · audit trail · regulator-ready documentation
Real estate cycle slowdown	2	3	Low	All	Multi-product hedge (LAP + MSME) · peri-urban less cyclical than urban premium
Interest rate compression	2	2	Low	All	Monitored · not actively mitigated · market-wide factor

Scoring: Likelihood 1 (rare) – 5 (near certain). Impact 1 (minor) – 5 (existential). Residual level reflects post-mitigation exposure, reviewed quarterly with Thiru. High-residual items trigger monthly founder review; Medium trigger quarterly; Low are monitored only.

How we cost a file.

Cost per file is one of the most important – and most asked – numbers in this plan. The figures shown in the Unit Economics table (§4.3) are indicative working assumptions built from the methodology below. Every assumption flagged with VALIDATE requires team input before this annexure can be considered finalised.

WORKING DOCUMENT · TEAM VALIDATION REQUIRED

This annexure is structured to make every assumption explicit and auditable. Industry-default placeholders are used where Capitabel-specific data is not yet captured. Replace placeholders with actual numbers from Q1 FY 2026–27 file-level cost capture in Zoho. Suggested owner: Devesh, with input from Harish (tech costs) and Chidu (founder time attribution).

G.1 · Methodology

Fully-loaded cost per file is the sum of three components:

COMPONENT	WHAT IT COVERS	ALLOCATION METHOD
Direct costs	Connector / sub-DSA payouts, sourcing channel fees (BNI dues attribution per file), CIBIL pull, courier, lender-required documentation	Per-file basis — incurred only when the file is processed
Indirect costs	Time-attributed salaries: RM, Credit & Ops, Customer Support, ASM, founders	Salary ÷ working hours per year × hours per file
Overhead allocation	Technology, office, marketing, advisor retainer, admin, travel	Fixed quarterly cost ÷ projected file count for the quarter

G.2 · Time Attribution Assumptions

VALIDATE

For each role, the working assumption is hours spent per file end-to-end (lead qualification → sanction → disbursement → commission tracking). Assumes 1,800 productive working hours per person per year (~7.5 hrs/day × 240 days).

ROLE	HRS · URBAN HL	HRS · PERI- URBAN HL	HRS · LAP	HRS · MSME	NOTES & ASSUMPTIONS TO VALIDATE
RM (sourcing + chase)	8	10	14	25	Peri-urban higher due to documentation friction · MSME highest due to back-and-forth
Credit & Ops Executive	3	3	5	8	Per-file file preparation, lender submission, follow-up
Customer Support (Monica)	2	2	2	3	Onboarding call, document checklist guidance, status updates
ASM / Manager	1	1	2	4	Oversight, escalation, lender-side relationship management
Founder (Harish/Chidu)	0.5	0	1	3	Only on complex / large-ticket / strategic files · Q: do founders touch every file or only specific ones?
Total person-hours per file	14.5	16	24	43	—

G.3 · Salary Attribution per File

VALIDATE

Indirect cost = (annual fully-loaded salary ÷ 1,800 hours) × hours per file. Salaries from Annexure B benchmarks; midpoints used here.

ROLE	ANNUAL SALARY (MID)	₹ / HOUR	URBAN HL	PERI-URBAN HL	LAP	MSME
RM	₹4 L	₹222	₹1,776	₹2,220	₹3,108	₹5,550
Credit & Ops Exec	₹4.5 L	₹250	₹750	₹750	₹1,250	₹2,000
Customer Support	₹3.5 L	₹194	₹389	₹389	₹389	₹583
ASM / Manager	₹6.5 L	₹361	₹361	₹361	₹722	₹1,444
Founder (blended)	₹15 L*	₹833	₹417	₹0	₹833	₹2,500
Indirect (salary) per file	—	—	₹3,693	₹3,719	₹6,302	₹12,077

* Founder cost is opportunity-cost-based, not actual cash drawdown today. **Q for team: should founder time be costed at full opportunity rate, or excluded from cost-per-file until a board-determined founder salary is in place?**

CAPITABEL · FY 2026-27 BUSINESS PLAN · CONFIDENTIAL

65

G.4 · Connector Economics

VALIDATE · HIGHEST-IMPACT ASSUMPTION

Connector payouts are typically the single largest direct cost on a file. Industry convention is a percentage of Capitabel's earned commission, often paid only on disbursement. Working assumptions below — **these need explicit team validation as they materially affect every cost-per-file figure.**

CONNECTOR TYPE	% OF LEADS	TYPICAL PAYOUT	NOTES / QUESTIONS TO RESOLVE
Direct (no connector)	30%	0%	Capitabel-sourced via Manor Group, BNI, digital, walk-in. Q: actual % today?
Sub-DSA / freelance agent	35%	35–50% of commission	Most common in peri-urban / Andhra. Q: what's our typical negotiated rate?
BNI & professional networks	15%	10–20% of commission	Plus annual BNI dues amortised per file. Q: do we pay referral fee on top of BNI dues?
Real estate referral (developer / broker)	15%	25–40% of commission	Builder relationships via Sanctuary Spaces. Q: are these formalised or ad-hoc?
Channel partners (Ruloans & aggregators)	5%	Net commission split 60/40	Ruloans takes their share before passing to us. Different mechanic — embedded in our 0.59% blended yield. Q: confirm split?

Working assumption for cost-per-file calculation: **weighted-average connector cost = ~25% of gross commission per file** (across all sources, including 30% direct files paying 0%). This is the largest single cost item and the most sensitive lever in Capitabel's unit economics.

G.5 · Other Direct Costs per File

VALIDATE

ITEM	COST PER FILE	NOTES
CIBIL pull (consumer)	₹100–150	Per query · sometimes multiple per file
CIBIL Commercial (MSME)	₹500–800	MSME files only · sometimes paid by lender
Document logistics (courier, scanning, printing)	₹300–500	Higher in peri-urban geographies
Legal opinion (where applicable)	₹0–5,000	Q: do we ever pay for legal opinions, or always lender-paid?
Property valuation	₹0–3,000	Q: when does Capitabel pay vs lender?
Technical report	₹0–2,500	Q: typically lender-paid — confirm?
Other direct (excl. connector)	₹500–8,000	Wide range driven by product type and lender requirement

G.6 · Overhead Allocation per File

VALIDATE

Annual overhead from §4.6 P&L = ₹50–60 L (technology + office + marketing + advisor + admin + travel). Across the planned 180–220 files in FY 2026–27, this gives an overhead allocation of **₹23,000–33,000 per file on average.**

Methodology question for team: should overhead be allocated equally across files (simple average) or weighted by file complexity / commission earned (a ₹2 L MSME file consuming 3× the management oversight should arguably carry 3× the overhead)? Current working assumption is equal allocation — **likely understates MSME costs and overstates peri-urban HL costs.**

G.7 · Cost-per-File Summary by Product

Bringing it all together. Each row equals: connector payout + indirect (salary) + other direct + overhead allocation.

PRODUCT	COMMISSION	CONNECTOR (~25%)	INDIRECT (SALARY)	OTHER DIRECT	OVERHEAD	TOTAL COST / FILE
Home Loan · Urban	₹48,000	₹12,000	₹3,693	₹1,000	₹1,300	~₹18,000
Home Loan · Peri-urban	₹17,000	₹4,250	₹3,719	₹800	₹1,300	~₹10,000
LAP	₹72,000	₹18,000	₹6,302	₹1,500	₹1,300	~₹27,000
MSME · Business Loan	₹2,02,500	₹50,625	₹12,077	₹4,000	₹1,300	~₹68,000

Overhead is held constant per file in this view (~₹1,300 attributed across estimated 200 files = ₹26 L of fixed overhead). The Unit Economics table in §4.3 used rounded approximations; actuals when validated will differ.

G.8 · Critical Questions for Team Validation

INPUTS THE TEAM MUST VERIFY BEFORE THESE NUMBERS ARE BOARD-READY

- Connector payout structure** — Actual %-of-commission split paid across each connector type (sub-DSA, BNI, real estate referral, channel partner). And the % of leads sourced through each. This is the single most material assumption in the entire cost model.
- Founder time attribution** — Do Chidu and Harish touch every file or only complex / large-ticket / strategic files? Should founder time be costed at full opportunity rate or excluded until a formal founder salary is set?
- RM hours per file** — Validate the 8 / 10 / 14 / 25 hour assumptions against actual time logs. If RMs spend significantly more time on follow-ups than assumed, indirect cost goes up materially.
- Other direct costs (legal, valuation, technical reports)** — Confirm what Capitabel pays for vs what is always lender-paid. Variability here is wide.
- Overhead allocation method** — Equal split per file (current assumption) or weighted by complexity / commission? Equal split likely understates MSME costs.
- Commission timing & recovery** — These costs are incurred over the full file lifecycle (sourcing → disbursement). Commission is received only after disbursement, with 30-day SLA. Working capital cost of carry is not currently in this model — should it be?

From ₹10 Lakhs to ₹40 Crores.

The fundraise plan is built around a clear preference: **keep dilution low, scale profitably, and build conviction with each round before the next**. Three sequential rounds — Angel (Q3 FY 2026–27), Seed (Q1–Q2 FY 2027–28), Series A (mid-FY 2027–28 to early FY 2028–29). Cumulative dilution post-Series A: ~45–50%. Capital-light by design — every round is sized to the next 12–18 months of operating need plus a strategic cushion, not to a maximum-funding-available logic.

H.1 · Working Capital Model

Starting position: **₹10 Lakhs cash on hand**. Founders draw zero cash compensation through FY 2026–27 (modest market draw begins post-Seed). The model below ties monthly burn to the Annexure B hiring ramp and revenue (commission inflow with 30-day SLA from disbursement).

QUARTERLY CASH POSITION	Q1	Q2	Q3	Q4	FY TOTAL
Beginning cash position	₹10 L	₹2 L	~₹0	+₹3.0 Cr*	—
Commission revenue (30-day lag)	₹10 L	₹45 L	₹85 L	₹85 L	₹2.25–2.65 Cr
Less: Salaries (per Annexure B ramp)	(₹10 L)	(₹25 L)	(₹40 L)	(₹65 L)	(₹1.40–1.60 Cr)
Less: Tech investment	(₹6 L)	(₹9 L)	(₹6 L)	(₹4 L)	(₹25–35 L)
Less: Office, admin, travel, marketing	(₹2 L)	(₹4 L)	(₹4 L)	(₹4 L)	(₹14 L)
Less: Thiru retainer (₹2 L/mo)	(₹6 L)	(₹6 L)	—	—	(₹12 L)
Net cash flow (organic)	(₹14 L)	(₹4 L)	+₹35 L	+₹12 L	+₹29 L
+ Angel round (Q3 close)	—	—	+₹3.0 Cr	—	+₹3.0 Cr
Ending cash position	₹2 L	~₹0	+₹3.0 Cr	+₹3.12 Cr	—

Q1–Q2 are the tightest period. ₹10 L starting cash bridges the first ~6 months of build-out before commission revenue meaningfully covers monthly burn. By end of Q2 the company is essentially at zero cash but cash-flow positive operationally. Q3 Angel close (₹3 Cr conservatively assumed) restores runway and funds the FY 2027–28 expansion, BC licence prep, and Seed-round runway. *Q4 ending cash assumes minimal Angel deployment in Q4 itself — most use of funds rolls into FY 2027–28.

Working capital sensitivities. If commission realisation slips by 30 days (60-day SLA instead of 30), Q1–Q2 cash dips to **negative ₹15–25 L** — bridge from founder personal capital or short-term advance against FY 2025–26 receivables. If Q1 hiring is preponed (e.g., MSME Sales Manager + Senior RM both joining April vs phased Apr–Jun), cash gap in Q1 widens by ~₹6–8 L. Plan assumes the \$4.6 P&L pacing — any acceleration tightens the bridge.

H.2 · Investor Check-Size Benchmarks

Capitabel's three rounds will draw from different parts of the Indian early-stage VC ecosystem. The table below maps the named funds to their typical check sizes — sourced from public Tracxn / fund websites / recent deal data.

INVESTOR	TYPICAL STAGE	AVG CHECK SIZE	FUND SIZE	CAPITABEL-RELEVANT NOTES
ANGEL-STAGE CANDIDATES (Q3 FY 2026-27 — ₹3-4 CR ROUND)				
Inflection Point Ventures (IPV)	Angel / pre-seed	₹2-4 Cr	₹1,200 Cr deployed	Active in lending/fintech (Roopya seed ₹4 Cr, Feb 2026) · 24,000+ angel network · led by Mitesh Shah, Ankur Mittal
Better Capital	Pre-seed / Angel	₹50 L-₹3 Cr	\$50 M Fund	Vaibhav Domkundwar · India II fintech focus · invests at idea-to-MVP stage
Domain Angels (ex-HFC/NBFC)	Angel	₹25 L – ₹1 Cr each	—	Strategic value beyond capital — lender intros, regulatory read, banking-network credibility
Real Estate Angels (CREDAI)	Angel	₹25 L – ₹1 Cr each	—	Builder community access · referral pipeline at point of property transaction
Pravega Ventures	Pre-seed / Seed	₹2-8 Cr	\$50 M Fund	Smaller ticket end can lead Angel · II early-stage tech focus · India-first
Artha Venture Fund	Pre-seed / Seed	₹1-5 Cr	~\$50 M	Impact + fintech mandate · financial inclusion thesis · South India geography
SEED-STAGE CANDIDATES (Q1-Q2 FY 2027-28 — ₹8-12 CR ROUND)				
Stellaris Venture Partners	Seed / Series A	\$2.42 M (~₹20 Cr) avg seed	\$300 M Fund	Fintech mandate · backed Propelld III · seed cheque sometimes too big for Capitabel — could co-lead with smaller fund
Blume Ventures	Seed / Series A	\$2.04 M (~₹17 Cr) avg seed	\$250-275 M Fund	V Backed Optimo Capital — understands LAP/MSME deeply · most natural Seed lead
Pravega Ventures (Seed extension)	Seed	₹4-8 Cr at Seed	\$50 M	Could double-up from Angel into Seed if early traction strong
Picus Capital	Seed / Series A	₹15-40 Cr	€700 M global	Backed BASIC Home Loan from Seed (2020) — exact same DSA-marketplace thesis
SERIES A CANDIDATES (FY 2027-28 TO FY 2028-29 — ₹25-40 CR ROUND)				
Bertelsmann India Investments	Series A / B	\$5-15 M	~\$300 M India	Led BASIC Home Loan Series B (Sep 2024, \$10.6M) — direct comparable thesis

INVESTOR	TYPICAL STAGE	AVG CHECK SIZE	FUND SIZE	CAPITABEL-RELEVANT NOTES
Peak XV (Surge / VC)	Seed to Series C	\$3–25 M	~\$2.85 Bn	Backed Ambak Series A · backed Prayaan Capital Series A · two direct Capitabel comparables
Elevation Capital	Series A / B	\$10–30 M	~\$670 M Fund VIII	Large fintech portfolio · BFSI executive network · strong follow-on appetite
Accel India	Series A onwards	\$5–20 M Series A	~\$650 M India	Largest India-focused VC · proven multi-stage support · broad fintech portfolio
Fundamentum Partnership	Series A / B	\$5–15 M	~\$225 M	Nandan Nilekani-backed · Digital India + financial inclusion thesis

Check sizes are typical first-cheque ranges from each fund. **Capitabel will be at the small end of Stellaris/Blume's seed range** (their average seed is \$2 M+ – Capitabel's seed is targeted at \$1–1.5 M). This is fine – both funds do smaller cheques when the conviction is high – but it means the round is best constructed with a smaller fund leading (Pravega, Artha, or Better Capital extension) and a larger fund participating.

H.3 · Round Sizing & Valuation Framework

Anchored on the closest direct comparable: **BASIC Home Loan** (multi-product home loan DSA, BC model, \$19.3 M raised over 5 rounds, post-Series B valuation ₹378 Cr in Nov 2024 with ₹15,000 Cr disbursement run rate). At equivalent traction milestones, Capitabel valuations should track BASIC's trajectory — adjusted down for smaller scale and earlier stage, adjusted up for the multi-product (HL + LAP + MSME) mix and South India geography focus.

ROUND	SIZE	PRE-MONEY	POST-MONEY	DILUTION	CUMUL DILUTION	ANCHORED ON
Angel · Q3 FY 2026-27 (Oct-Dec 2026)	₹3-4 Cr / ~\$500 K	₹15-20 Cr	₹18-24 Cr	15-20%	15-20%	Pre-revenue lending startup norm · BASIC Seed (2020) was at lower scale
Seed · Q1-Q2 FY 2027-28	₹8-12 Cr / \$1-1.5 M	₹40-50 Cr	₹50-60 Cr	16-20%	~30-35%	BASIC Series A (Oct 2021): \$3.5 M at ~₹26 Cr post when at 1-yr-old, ₹400 Cr cumulative disbursement
Series A · mid FY 2027-28 to early FY 2028-29	₹25-40 Cr / \$3-5 M	₹120-180 Cr	₹150-220 Cr	16-22%	~45-50%	BASIC Series B (Sep 2024): \$10.6 M at ₹378 Cr post-money with ~₹9,000 Cr cumulative disbursement

Capitabel's valuations should benchmark **at or slightly below** BASIC's at equivalent traction — BASIC has the brand and capital headstart (5 years older, North India base), but Capitabel has multi-product breadth and South India depth that BASIC lacks. Series A pre-money of ₹120-180 Cr is realistic if Capitabel demonstrates ₹500-700 Cr cumulative disbursement, ₹3-5 Cr annual profit, and a working co-lending pilot by the time of the raise.

H.4 · Use of Funds by Round

ROUND	PRIMARY USE	INVESTOR PROFILE TARGETED	OUTCOME AT CLOSE
Angel	Working capital · Phase 2 tech build · 5 strategic hires across MSME / LAP / lender relations · BC framework compliance	Smaller VCs (Pravega · Artha · Better Capital · IPV) leading + 5-8 strategic angels (ex-HFC/NBFC + RE + fintech operators)	18-24 months runway through Seed close · ₹500 Cr cumulative disbursement on track
Seed	Geographic expansion (3 new clusters) · 50-person team build · BC licence + first co-lending pilot · Customer-facing platform launch (Annexure D Phase 3)	Stellaris · Blume · Pravega (extension) · Picus · sector-specialised funds	₹500 Cr annual run rate · co-lending pilot live · Series A readiness
Series A	AIF Cat II / NBFC capital base · National geography expansion (Karnataka + Maharashtra) · Full Matching Engine + Banker CRM at scale · 150-person team	Bertelsmann · Peak XV · Elevation · Accel · Fundamentum	₹1,000 Cr+ annual run rate · AIF/NBFC structure live · Series B narrative built

H.5 · Why This Pathway (Angel → Seed → Series A)

Two alternatives were considered and rejected:

Skip Angel, go directly to Seed. Cleaner cap table, lower setup cost, but requires demonstrating Series A-level traction without bridge capital. Working capital model (H.1) shows ₹10 L starting cash is insufficient to bridge to a ₹8–12 Cr Seed close in Q1 FY 2027–28. Without an Angel cushion, Q3–Q4 hiring and tech investment have to be deferred — which in turn delays the traction needed to justify Seed valuation. **Net result: 6–9 months slower to Seed, weaker Seed terms.**

Bootstrap to Series A. Maximises founder equity but requires the business to fund national expansion, BC licence, and AIF/NBFC capital from operating cash flow alone. At ₹1 Cr profit FY 2026–27, this means 10+ years to accumulate the ₹10–15 Cr needed for AIF/NBFC seed capital — which forfeits the timing advantage of being early to the BC + co-lending evolution. **Net result: 5+ years slower to scale, missed competitive window.**

The chosen pathway — Angel (₹3–4 Cr) → Seed (₹8–12 Cr) → Series A (₹25–40 Cr) — keeps cumulative dilution to ~45–50% post-Series A while funding each strategic gate with conviction. Each round is sized to *the next 12–18 months of operating need plus a strategic cushion*, not to a maximum-funding-available logic. Founders retain meaningful equity for Series B and a possible Series C ahead of AIF/NBFC structure decision in FY 2028–29.

Every lender, all 52 files.

A single-view breakdown of all lender relationships since inception — disbursements, file count, share of portfolio, product mix, and relationship status. Supplements the top-10 view in §3.5 with the long tail. Refresh quarterly with first Monday-of-quarter Zoho data export.

Working document — populated from **Capitabel internal Excel**. Top-10 lenders reflect data through 4 April 2026 (per §3.1). New lenders flagged with VALIDATE need actual disbursement / file counts confirmed by team. Long-tail entries placeholdered pending full lender list import.

LENDER	DISBURSED	FILES	% PORTFOLIO	PRODUCT MIX	AVG TICKET	GEOGRAPHY & STATUS
TOP 10 LENDERS BY DISBURSEMENT (95%+ OF PORTFOLIO VALUE)

Data as at 4 April 2026 — refresh pending. Long-tail breakdown to be populated in next iteration from Capitabel internal Excel sheet. New lender entries (HomeFirst, Muthoot, Piramal) currently placeholdered — confirm disbursement and file counts with operations team. Goal: complete full per-lender breakdown for Q1 FY 2026–27 review with Thiru.

Five reviews. Every cadence.

Operational rhythm that converts the plan into weekly accountability. Five review formats — Daily, Weekly, Bi-weekly, Monthly, Quarterly — each with a defined attendee list, standing agenda, required data, and decision register. Designed to be implemented from Q1 FY 2026–27.

REVIEW	CADENCE	ATTENDEES	DURATION	PRIMARY FOCUS
Daily Standup	Every working day · 9:15 am	RMs + Credit & Ops + Customer Support	15 min	Pipeline movement · today's lender follow-ups · blockers · file submissions
Weekly Operations	Mondays · 9:00 am	Founders + ops + RM leads	60 min	Disbursement actuals vs target · files in pipeline · lead TAT · lender submission TAT · commission receivables
Bi-weekly Tech & Engine	Alternate Wednesdays · 2:00 pm	Harish + Tech Associate + Devesh	45 min	Phase milestone progress · conversation transcription quality · integration status · lender knowledge base refresh
Monthly Business	First Tuesday of month · 10:00 am	Founders + Thiru + key managers	2 hr	Full KPI scorecard · hiring progress · lender panel health · must-win battle status · financial actuals vs P&L
Quarterly Strategic	Mid-quarter month · half-day	Founders + Thiru + advisors / select angels	4 hr	Macro Review (per §6.6) · must-win recalibration · fundraise progress · regulatory intelligence · investor readiness checklist

J.1 · Daily Standup Format

Standing agenda	(1) Yesterday's wins & misses (2 min) · (2) Today's must-do per RM (5 min) · (3) Blockers + escalations (5 min) · (4) Lender follow-up commitments (3 min)
Required data	Zoho CRM pipeline view · open files at each stage · today's banker meetings calendar
Decision output	Single shared blockers list updated in Zoho · escalations routed to founders by EOD
Owner / Chair	Senior RM (rotating monthly) · Monica notes blockers

J.2 · Weekly Operations Review Format

Standing agenda	(1) Disbursement: actual vs target (10 min) · (2) Pipeline by stage and lender (15 min) · (3) Lead-to-submission TAT and Loan Offer TAT (10 min) · (4) Commission receivables aged 30/45/60+ days (10 min) · (5) Top 3 priorities for next week (15 min)
------------------------	--

Required data	MIS dashboard · KPI scorecard week-over-week · receivables aging report · lender submission log
Decision output	Updated weekly action list with owners and deadlines · escalations to monthly review · recalibration of weekly disbursement target if > ±15% off
Owner / Chair	Harish (rotating with Devesh) · Monica documents decisions in shared log

J.3 · Bi-weekly Tech & Engine Review Format

Standing agenda	(1) Phase milestone progress vs Annexure D plan (10 min) · (2) Conversation transcription rate & quality sample (10 min) · (3) External intelligence ingestion status — lender policies / news / NPA refreshes (10 min) · (4) Integration roadmap blockers (10 min) · (5) Tech budget utilisation (5 min)
Required data	Phase milestone tracker · transcription log · external intel refresh log · tech P&L vs budget
Decision output	Tech milestone re-baseline if needed · vendor / hire decisions · escalations to monthly review
Owner / Chair	Harish · Tech Associate documents

J.4 · Monthly Business Review Format

Standing agenda	(1) Full KPI Scorecard review — every metric in §5.5 (30 min) · (2) Financial actuals vs P&L plan, with variance analysis (20 min) · (3) Hiring pipeline + 60-day check on recent hires (20 min) · (4) Lender panel health — top-10 lender activity, decision hierarchy in action, % direct routing (20 min) · (5) Must-win battle progress per quarter plan (20 min) · (6) Risk register check-in (10 min)
Required data	Full MIS scorecard · monthly P&L · hiring tracker · lender activity log · must-win RAG status · risk register update
Decision output	Updated must-win RAG · monthly action list · go/no-go on next month's hires · escalations to quarterly review · variable-pay drawdown decisions for Thiru deliverables
Owner / Chair	Chidu (rotating with Harish) · Devesh prepares pre-read · all founders + Thiru attend

J.5 · Quarterly Strategic Review Format

Standing agenda	(1) Macro Review per §6.6 — Economic Survey, RBI Monetary Policy, MoSPI GDP, Union Budget where relevant (30 min) · (2) Must-win battle close-out + next-quarter recalibration (45 min) · (3) Fundraise progress — Angel / Seed / Series A pipeline per Annexure H (30 min) · (4) Regulatory intelligence sweep — RBI circulars, MSME policy, sectoral guidance (20 min) · (5) Investor readiness checklist update per §7.4 (15 min) · (6) Lender rationalisation review — decision hierarchy effectiveness, % direct routing actuals vs target (30 min) · (7) Open items + strategic decisions (30 min)
Required data	Quarterly P&L · macro briefing pack · fundraise tracker · regulatory log · investor checklist · lender routing analysis · must-win quarter close report
Decision output	Next-quarter must-win battles defined · fundraise next-actions · lender panel adjustments · strategic recalibration if needed · governance pack updates · advisor review for Thiru engagement extension
Owner / Chair	Chidu · Thiru chairs governance section · all founders + Thiru + select advisors / angels attend

IMPLEMENTATION NOTE

Roll out one cadence at a time, starting with **Daily Standup + Weekly Operations** in Q1 FY 2026–27. Add Monthly Business Review in Q1 month 2. Add Bi-weekly Tech once Phase 1 build kicks off (Q1). Quarterly Strategic begins end of Q1 (June). Each format should be reviewed and refined after 3 cycles based on what's actually being decided vs what's being talked through. The point of these reviews is decisions made, not status reported.
